## Superintendent's Proposed FY 2016 Capital Budget

Capital Improvement Program FY 2017–2021 Long-Range Master Plan FY 2016–2025

# Executive Summary

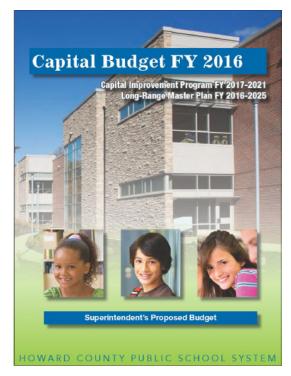

September 2014

### Introduction

This document contains the Howard County Public School System's (HCPSS) Superintendent's Proposed FY 2016 Capital Budget and the FY 2017–2021 Capital Improvement Program (CIP) schedules proposed by the Superintendent for consideration by the Board of Education. Projects are presented for the next fiscal year and future years, documenting long range plans for the system. This document was preceded by an analysis of enrollment projection trends presented in the feasibility study presented June 26, 2014.

The Superintendent's Proposed Capital Budget is the first step in this annual process which will ultimately end with the approval of the Board of Education's final Capital Budget in May 2015. The Capital Budget is submitted much earlier than the Operating Budget to accommodate deadlines associated with submission of the Capital Budget to the Maryland State Department of Education.

The **Executive Summary** provides an introduction to the Superintendent's Proposed FY 2016 Capital Budget, the Capital Improvement Program FY 2017–2021, and the Long-Range Master Plan FY 2016—2025. It presents a high level overview of the budget process and the FY 2016 Superintendent's Proposed Capital Budget. Included in the Executive Summary is the Superintendent's Message which provides an overview of the budget issues. Among other information found in the Executive Summary is a discussion of the capital budget alignment with *Vision 2018*, enrollment projections and student capacities, recent capital budget accomplishments, the capital budget schedule, and information on the capital budget process.

**System Information** presents information on the county and the school system, with maps of school locations throughout the county displayed by school level. The Project Detail presents detail on each project presented in the proposed FY 2016 Capital Budget as well as information on longer range project plans. The **Supporting Data** includes data from the feasibility study, detailed enrollment data, school and region test for APFO, fully funded projects in process, facilities constructed and/or renovated with state funds, and the glossary.

### Message from the Superintendent

September 11, 2014

**Howard County Residents:** 

The Howard County Public School System (HCPSS) Superintendent's Proposed FY 2016 Capital Budget and the Capital Improvement Program FY 2017–2021, and the Long-Range Master Plan FY 2016–2025, provide the framework and plans for educational facilities that facilitate a supportive learning environment. The plans are integral to achieving *Vision 2018*, *Fulfilling the Promise of Preparation*, the school system's five-year strategic plan. The capital improvement program and long-range master plan address projected student capacity needs by implementing capital projects and facility renovations when and where they are most needed. The \$87.8 million FY 2016 proposed capital budget was developed from these plans.

The capital budget process, detailed within the Executive Summary, links capital planning with attendance area planning and addresses long-range planning issues identified in the annual feasibility study. Presented to the Board of Education on June 27, 2014, this year's Feasibility Study provided new enrollment projections and proposed future redistricting.

Several factors affect the total FY 2016 Capital Budget. This year's capital improvement program provides for student capacity, renovations, and various other improvements that staff, parents, and community leaders have identified as needed. The formula used by the state to calculate school construction costs has increased to \$260.98 per square foot. Project budgets have increased to reflect rising costs such as the requirement to pay prevailing wage on all projects after July 1, 2014, costs to comply with LEED requirements, and general inflationary increases.

Highlights of the FY 2016 Capital Budget and Long-Range Master Plan are noted below:

- The FY 2016 Capital Budget is \$87.8 million.
- The cumulative total of the ten-year Long-Range Master Plan for FY 2016—2025 is \$1.32 billion and includes funding for four new elementary schools, a new high school, a replacement middle school, and a new middle school which are necessary to meet projected enrollment growth and capacity needs. In addition, it includes approximately \$880.9 million in systemic renovations, modernizations, major programmatic renovations, and additions to existing school facilities.
- HCPSS is projected to enroll 12,013 additional students between 2015 and 2025. A total of 5,462 (Grades K-12) additional seats are provided in the FY 2016–2025 Long-Range Master Plan. Coupled with the 54,522 seats of existing capacity in 2014 and the use of relocatable classrooms where required, the proposed capital program is sufficient to meet near-term student enrollment needs.

One of the most significant updates to the FY 2016–2025 Long-Range Master Plan is the addition of new school projects to reflect the increase in capacity needs resulting from development and growth in the County. These replace the administrative building projects being reexamined for alternative solutions that were included in prior plans. The result is a long-range master plan that more accurately predicts future funding needs.

Funding of the capital budget currently depends predominantly upon the issuance of bonds by the County and state. With rising costs and growing capacity needs, the future capital needs of the school system are projected to markedly surpass current County bonding limits. We look forward to continuing our ongoing discussions with County Council and other stakeholders regarding both dedicated and alternative financing sources for education.

In alignment with Vision 2018, we are implementing best practices to improve the existing capital planning processes. These will ensure that future master plans provide a vision for capital plans and investments based upon in depth analysis, and that they incorporate educational needs as well as financial factors. A new Long-Range Capital Planning Committee will assist in the development of the long-range master plan. The committee will evaluate and prioritize the many potential projects, making recommendations based upon support for Vision 2018, updated data from the annual feasibility study, stakeholder input, and financial considerations.

The FY 2016 Capital Budget Schedule is detailed at the end of the Executive Summary and includes the dates of Board public hearings and work sessions. The Board of Education will give final approval to the capital budget on May 22, 2015 at 9:00 a.m.

I look forward to working with the Board of Education, parents, community members and business leaders to secure the necessary funding and support for the improvements to Howard County public school facilities.

Sincerely,

Renee A. Foose, Ed.D.

Ron G. Im

Superintendent

**Howard County Public School System**

### **Fulfilling the Promise of Preparation**

### **Vision**

Every student is **inspired** to learn and **empowered** to excel.

#### **GOAL 1**

#### **Students**

Every student achieves academic excellence in an inspiring, engaging, and supportive environment.

#### GOAL 2

### Staff

Every staff member is engaged, supported, and successful.

### **Mission**

We cultivate a **vibrant** learning community that prepares students to thrive in a **dynamic** world.

#### GOAL 3

### Families and the Community

Families and the community are engaged and supported as partners in education.

#### GOAL 4

#### Organization

Schools are supported by world-class organizational practices.

### **Guiding Principles**

We believe in...

- Achieving excellence in all we do
- Developing each student's unique gifts
- Engaging students in relevant, experiential, and personalized learning
- Cultivating creative problem solving, critical thinking, and innovation
- Promoting integrity, civility, and global citizenship
- Enriching learning by honoring our diversity
- Fostering a culture of collaboration, trust, and shared responsibility
- Removing barriers to success

#### THE HOWARD COUNTY PUBLIC SCHOOL SYSTEM

### Capital Budget Support of Vision 2018

#### Alignment with Strategic Plan

Vision 2018: Fulfilling the Promise of Preparation is the Board's strategic plan to build an educational program that is among the best in the world. While much of this plan is implemented in the operating budget, the CIP supports achievement of each goal in Vision 2018.

The Capital Improvement Program (CIP) supports *Goal 1 Strategy* 1.4.6: Configure physical spaces to facilitate learning by providing spaces configured to facilitate learning in accordance with board approved

educational specifications. The CIP also supports *Strategy 1.8.2: Provide opportunities for students to explore* a wide variety of experiences and to build competencies in academics, athletics, and the arts. Classrooms are specified to contain students according to approved class size ratios. Beyond the regular classrooms, facilities have specialized spaces which are equipped to deliver all approved programs.

The CIP provides facilities with program areas for physical education and play areas for unstructured activity promoting physical activity as a part of every child's daily routine. Walking and biking are facilitated with pathways and bicycle racks. Facilities include a cafetorium outfitted with the necessary equipment to deliver approved menu items.

Facilities also provide opportunities for students to learn how to balance their choices in activity modalities, including independent activity, face-to-face interaction, athletics, creative endeavors, and screen time. Facilities are designed to physically and socially activate students, staff, and the community. Stimulating indoor and outdoor spaces utilize light and appealing design to create spaces for impromptu use.

Goal 2 seeks to have every staff member engaged, supported, and successful. Facility planning includes cross functional representatives of the school system at all levels of construction and renovation process from acquisition of land to engagement during construction. Planning, Construction, and Maintenance information are provided

online through Board Docs as well as separate web pages. Staff is engaged with satisfaction surveys and presentations at training sessions.

### Capital Budget Support of Vision 2018

Goal 3 seeks to have families and the community engaged and supported as partners in education. Facilities are designed with secure access points to ensures visitors' needs are addressed while protecting students and staff from intrusion. Classroom and staff work areas are designed to be comfortable and well lit. Projects include outreach to the community through meetings and presentations to ensure notification and collection of valuable stakeholder input. Staff coordinate with local officials, safety inspectors, and environmental regulators in support of student wellbeing.

Goal 4 seeks to ensure that schools are supported by world-class organizational practices. Facilities and equipment are constructed according to required codes and best practices. Regular safety and maintenance inspections are conducted according to local, state, and national standards. Industry best practices are implemented and benchmarks are identified and used. Examples include LEED standards and Green School Certification. Facilities are designed to incorporate technology sselected to support overall organized goals.

### **Capital Planning**

Capital planning is an ongoing process where the annual Capital Improvement Program (CIP) and Long-Range Master Plan are updated to reflect changes in enrollments, building capacities and other conditions. The Howard County Public School System (HCPSS) provides other relevant publications which should be taken as a whole with the capital budget. These include the Feasibility Study, Educational Facility Master Plan, and the Comprehensive Facility Maintenance Plan.

The formulation of the FY 2016 Capital Budget, FY 2017–2021 Capital Improvement Plan, and the FY 2016–2025 Long-Range Master Plan begins with the annual completion of enrollment projections first presented in the June 2014 Feasibility Study. The results of this projection are also included in this document in pre- and post-measures charts. Capacities of schools dictate the calculation of percentage capacity utilization, a measure which allows the effect of school projections to be illustrated in a meaningful way. A school with capacity utilization over 110 percent is deemed to be over-utilized, while a school below 90 percent capacity utilization is deemed to be under-utilized. This range is set by Board of Education policy.

Major findings from the June 2014 Feasibility Study which have been factored into this request include:

- The projected need for New ES #42 is more urgent than was previously projected. A site has been procured and approved allowing planning in FY 2016.
- The renovation of Dunloggin MS should include new capacity. The renovation presents an opportunity to gain capacity in an area with strong growth.
- Ellicott Mills MS should be expanded to a capacity in line with the larger schools identified in the Gilbert MS Capacity Study.
- Trends support inclusion of three new elementary school projects and one new middle school project in the long range master plan.

The redistricting of school attendance areas is an integral part of the CIP. The HCPSS is responsible for ensuring that school buildings in the county are run efficiently and effectively. This means keeping schools at or near capacity and ensuring that most available seats are used before new schools would be built. Redistricting is used to ensure that existing capacity and the scheduled capital projects efficiently accommodate projected student enrollments. While redistricting plans are implied for new facilities proposed in this plan, formal approval of those plans will not occur until the year before they will take effect. Changing circumstances may require different plans.

For planning purposes, the school attendance areas are grouped into six planning regions. Redistricting plans may include more than one region. The schools and their regions are identified on the elementary school level page, middle school level page, and the high school level page found in the Supporting Data section.

### Capital Planning and Growth Management

#### **General Plan**

The Capital Improvement Plan (CIP) is developed in alignment with the Board's strategic plan. However it must conform with another important planning document, the Howard County General Plan. Known as Plan Howard 2030, it includes annual residential development targets through 2030. The HCPSS will work closely with the Howard County Government to identify future funding sources so that our capital plan best supports the growth management goals of the Howard County General Plan. The Capital Budget is presented to the Howard County Planning Board so they may make a finding of plan conformance to the County Council.

The General Plan policy most relevant to this Capital Budget is *Policy 6.1h -- Schools. Make efficient use of existing school capacity avoiding unnecessary capital outlays.* HCPSS has conducted three years of redistricting since the adoption of PlanHoward 2030, in part to make more efficient use of existing schools. A total of 4,326 students were moved. More than three quarters of these students were relocated to existing schools. In 2011, prior to these redistricting efforts, 51 percent of students were in schools which met BOE target of 90-110 percent utilization. For the school year beginning in the fall of 2014, 64 percent of students will be in schools that meet this target. This was accomplished with only a four percent increase in capacity.

The General Plan also guides land development in accordance with relevant state growth management laws like the 1997 Priority Funding Areas Act and Smart Green and Growing Act which direct state spending to existing communities and places where local governments want state investment to support future growth, rather than farmland or undeveloped land. The HCPSS has invested heavily in priority funding areas of late with the construction of Ducketts Lane ES and Thomas Viaduct MS. The only projects proposed outside of the priority funding area today are the systemic renovations necessary to maintain systems in existing school, like boiler or HVAC upgrades.

#### **Adequate Public Facilities Ordinance**

The Adequate Public Facilities Ordinance (APFO) ties future residential construction in Howard County to projected school enrollments and school capacities. Elementary and middle school attendance areas that show a projected enrollment over 115 percent of a school's program capacity are closed to future residential development until an attendance area adjustment or a capital improvement can be completed. The APFO test for opening or closing a school attendance area to residential building looks at the projected population of a school three years out from the current year.

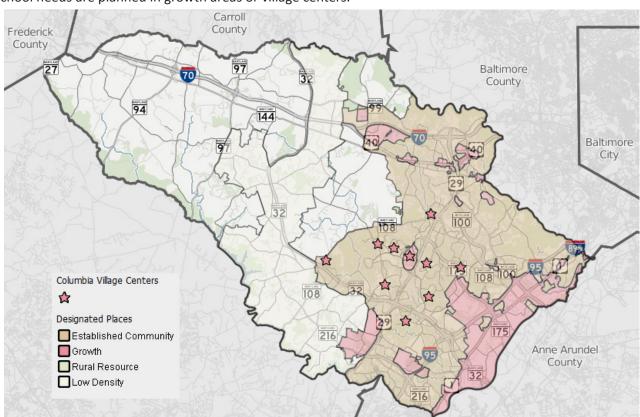

### Capital Planning and Growth Management

The APFO charts that appear in the Supporting Data section, are the charts that were approved for submission to the County Council by the Board of Education on May 9, 2013, and subsequently submitted to the Howard County Council and begin with the year 2016. The APFO charts do not include new schools or projects when their sites have not yet been acquired. As the school system secures deeds for the sites to these planned schools or projects, they will be reflected in that year's APFO chart.

Along with the elementary and middle school test, a regional test within planning regions at the elementary level is also included in the ordinance. Using the APFO Charts as indicators at the elementary level, all regions are "open" in 2016 and one school is "closed" in 2016. At the middle school level four schools are "closed" in 2016.

With the pre-/post-measures approach, the APFO formatted charts found in the Supporting Data section are in the pre-measures format. These charts represent the adjusted FY 2014 Capital Budget projects and the new projections. The post-measures charts represent the recommended capital projects for the FY 2015 Capital Improvement Program and redistricting results from the 2014 Feasibility Study and are for demonstrative purposes only.

The General Plan process was followed by adoption of the growth tiers map. Future development and school needs are planned in growth areas or village centers.

### **Enrollment Projections and School Capacities**

#### Methodologies

The formulation of the FY 2016 Capital Budget, FY 2017-2021 Capital Improvement Program, and the FY 2016-2025 Long-Range Master Plan begins with the annual completion of enrollment projections first published in the feasibility study. The projections included in this document are the result of a collaborative effort between the HCPSS, Howard County Department of Planning and Zoning, Maryland Department of Health and Mental Hygiene, and other county and state agencies.

The calculation of the future enrollment projection is based upon a "cohort survival ratio" method of projecting student enrollments. This methodology looks at past population patterns within the county to construct "survival ratios" in predicting a particular grade's migration through the school system. For example, cohort-survival ratios predict how many second graders will result from last year's first graders, how many third graders will result from last year's second graders, and continues until the number of twelfth graders from last year's eleventh graders is predicted. A geographical cohort survival ratio is used rather than a school-based cohort survival ratio to maintain comparability regardless of any redistricting. Finally, the effects of new housing, the net effect of resale of existing housing, and programs housed at the school that impact enrollment are added to the cohort.

#### Capacities

Equitable evaluation of the impact of projected enrollment growth requires calculation of the capacities of schools. Capacities are not necessarily fixed to the capacity designed when a building first opened. Changes in use, program, and standards can effectively change capacity.

High School capacities were evaluated and updated by the Board of Education in March 2009. High school program capacities are a product of either 80 or 85 percent of the total number of teaching stations multiplied by 25 students, exclusive of special education classrooms, and factored with consideration that not all teaching stations can be scheduled for use every period of the school day. Further, special-use teaching stations may not be adaptable for academic programs even if the space is available for a period of the school day.

Middle school capacities were evaluated and approved by the Board September 26, 2013, after a full study and report by Gilbert Architects Inc. Middle school program capacities are a product of 95 percent of the total number of teaching stations multiplied by 20.5 students, exclusive of special education classrooms. Like high schools, not all teaching stations can be scheduled for use every period of the school day.

Elementary school program capacities are based on 22 students for each Kindergarten classroom, 19 students for each classroom in Grades 1 and 2, and 25 students for each classroom in Grades 3–5. Elementary school special education classroom capacities are established by the mandated student/teacher ratios for the various programs. Not included in the capacities for elementary schools are resource/instructional spaces that are utilized on a school wide basis where no one group of studentsis assigned exclusively. Some examples of spaces not included in the capacity are gymnasiums or multipurpose rooms, cafetoriums, art rooms, music rooms, media centers, gifted and talented rooms, or rooms dedicated to regional programs such as RECC or Pre-K.

### **Types of Capital Projects**

The Capital Improvement Plan (CIP) provides for all facilities needs for the school system. Projects are identified by their purpose as described below.

#### **Capacity Projects**

New facilities or additions are proposed when projected enrollments cannot be accommodated reasonably within available capacity. The decision to construct a new facility or build an addition on an existing school involves consideration of fiscal implications as well as consideration of the following:

- Growth and location of population to be served
- Available capacity in surrounding schools
- Housing needs of current and desired educational programs

Each capacity project in the Capital Improvement Program (CIP) has first been evaluated in the annual feasibility study which balances school boundary redistricting choices with capital If the attending areas investments. for existing schools can be adjusted, capital expenditures can be avoided or at least delayed. The Board of Education will review the CIP and set direction as appropriate during capital budget presentations each year. The opening of new schools requires redistricting.

Redistricting is not annual but potential options are evaluated annually in the Feasibility Study.

From the receipt of planning funds until completion of a project, it typically requires a maximum of three years to plan and construct an elementary and/or middle school and four years for a high school. Some parts of the construction process can be expedited at cost.

#### **Non-Capacity Projects**

Capital projects which don't produce capacity are "systemic" and serve the long-term plans of HCPSS and the state of Maryland by keeping and maintaining the systems that support 30-40 year infrastructure investments. Most maintenance investments are covered by the operating budget and documented in the annual Comprehensive Maintenance Program published as a requirement of MSDE. Each year staff evaluate comprehensive maintenance program plans to identify projects that exceed regular maintenance and add these project to the capital improvement program as appropriate.

Renovations of existing schools are proposed when repairs of the structure's internal systems are no longer economically feasible. As the Comprehensive Facility Master Plan is updated using the results of ongoing facility assessments, specific projects are identified in the long-range master plan.

### **Types of Capital Projects**

The decision to renovate an existing school involves the following considerations:

- Prioritization of needs based upon the current facility assessment.
- Optimal sequencing to ensure eligibility for state funding.
- Existing electrical, HVAC, roofing and/ or other major mechanical systems needs.
- Educational space needs.
- Health and Safety needs
- Americans With Disability Act (ADA) needs.
- Need to provide improved spaces for general teaching areas and/or supporting areas.

When renovating an older school there are multiple considerations of how to best balance the existing footprint of the building against requirements defined in newer versions of the educational specifications. Renovation guidelines have been developed to provide a set of standards, guidelines, and procedures for use by HCPSS administrative staff and architectural/engineering firms engaged in the planning and design of renovation work for the school system.

#### **Roofing Projects**

A well planned roofing program is critical to all other systems in a capital facility. When roofing systems wear, the damage from a failure can impact other systems and multiply costs. HCPSS regularly inspects roofing systems and provides reports to the State of Maryland. Planning and project execution must balance system warranties, state funding eligibility and the risk of maintenance deferral.

#### **Playground Equipment**

Elementary school students are stimulated by interesting and engaging playground installations. The playground planning process considers the needs of a wide range of ages and skills to develop strength, social skills, coordination, balance and motor planning. Each year various playgrounds are replaced, repaired or upgraded based upon need.

### **Types of Capital Projects**

#### **Relocatable Classrooms**

Relocatable classrooms are pre-fabricated, stand-alone buildings which provide temporary capacity to a school to relieve overcapacity, provide temporary surge space during renovations/additions, or provide space for a school's program needs. Currently there are 234 modular/relocatable classrooms for Grades K-12 being used by the HCPSS, including several larger modular units of at least five classrooms.

In some cases modular units are integrated into a building's core facility, such as at St. John's Lane, and Waverly Elementary Schools, and Clarksville Middle School. These units are included in building capacity as they are considered permanent additions. In recent renovations modular units have been replaced like Bollman Bridge Elementary School. Similar plans are underway at Deep Run Elementary School and Patuxent Valley Middle School. The school system conducts annual reviews of the physical condition and usage of all relocatable/modular units. When units are inspected, the cost of repairs is weighed against the option of retiring the units.

#### Site acquisition and construction reserve

The selection and acquisition of appropriate school sites figures prominently in the development of a capital program. Each proposed school site is carefully evaluated prior to acquisition according to Board-approved selection criteria identified in Policy 6000 Site Selection and Acquisition. Delays in acquisition of suitable school sites may affect the timing of construction of needed schools, resulting in overcrowding situations. HCPSS continues to maintain a "land bank" to purchase potential sites or portions of land to augment sites. Larger sites identified in the subdivision review process may be reserved to be budgeted as line items in future capital budgets. This fund also is used as a reserve for unanticipated construction costs. Uses of the fund in this way has been infrequent.

**Executive Summary** 

### **Facility Use, Acreage, and Capital Projects**

### Land Bank as of July 1, 2014

The Board maintains ownership and/or the rights to purchase parcels of land for future school sites, commonly known as the "Land Bank." The following schedules detail the current land in the Land Bank.

The Board currently owns the following properties and is holding them in a land bank for future school construction.

| Owned Sites                        | Acreage | Location                 | Date Acquired | Cost            |
|------------------------------------|---------|--------------------------|---------------|-----------------|
| Sunny Spring Drive <sup>1</sup>    | 10      | Sunny Spring Drive       | 1974          | \$<br>1         |
| Future M.S. Site <sup>2</sup>      | 41±     | 2865 Marriottsville Road | 2007          | \$<br>1,700,000 |
| Future School Site <sup>3</sup>    | 8 ±     | Banbury Dr. Parcel G     | 2013          | \$<br>4,200,000 |
| Faulkner Ridge Center <sup>1</sup> | 9.01    | Marble Faun Lane         | 1968          | \$<br>1         |

The following properties are held by other parties for the future use by the Board of Education for school construction. Upon need for a school site, the Board may utilize these properties.

| Reserved Sites  | Acreage | Location                                    |
|-----------------|---------|---|
| Clary's Forest  | 10±     | Little Patuxent Parkway near Bright Passage |
| Dickinson       | 11±     | Eden Brook Drive and Weather Worn Way       |
| Dickinson       | 20±     | Sweet Hours Way east of Eden Brook Drive    |
| Harper's Choice | 5±      | Rivendell and Cedar Lane                    |
| Hopewell        | 10±     | Rustling Leaf at Deepage Drive              |
| Huntington      | 11±     | Vollmerhausen Road east of Murray Hill Road |

- (1) Rouse sold the land to HCPSS for \$1
- (2) The Future M.S. Site was acquired in a property swap with additional financial consideration for the Locust Park site (10 acres on Tamar Drive)
- (3) The land developer paid \$4M toward the property, reducing the total cost to \$4.2M for HCPSS.

### **Recent Capital Accomplishments**

HCPSS completed a number of impressive projects in the past year which provided urgently needed capacity and necessary renovations.

#### **New Facilities**

### **Ducketts Lane Elementary School**

The Ducketts Lane ES was built to provide relief to crowded schools in the northeast region. The environmental sustainability features of the building are expected to attain a LEED gold rating. The building is central to the neighborhood and has already become a popular center for the community. Ducketts Lane ES is a feeder to Thomas Viaduct MS and will serve enrollment growth in advance of the opening of New ES #42.

#### Thomas Viaduct Middle School

The Thomas Viaduct MS was built to provide relief to crowded schools in the northeast region. The environmental sustainability features of the building are expected to attain a LEED silver rating. The building is central to a new community called Oxford Square which is built as a walking community with access to the MARC station. The entire community is planned to attain a LEED gold rating.

#### **Renovated Facilities**

#### **Bollman Bridge Elementary School**

The Bollman Bridge ES project completely renovated an existing one-story building, including the addition of a four-classroom pod and the replacement of a temporary modular addition housing four classrooms for the third grade teaching pod with a permanent structure. This investment is the first of two major school projects in the Savage area as this budget includes funding for Patuxent Valley Middle School.

#### **Longfellow Elementary School**

The Longfellow ES project renovated an existing single story facility originally constructed in 1970 and renovated in 1987. The primary focus was conversion of the open space teaching pods into individual classrooms. In addition, the administrative suite was relocated to the front entrance, and the health suite was developed to meet current standards. In providing this reconfiguration, a design direction was taken that improves the current use and flow of the building. Departing from the open pod concept, grade clusters are formed to maintain cohesion between the individual grade levels. To aid in the interior renovations of the school, several additions were built to relocate key programs within the building to free interior space.

#### **Phelps Luck Elementary School Renovations**

Phelps Luck Elementary School is a single story facility with a high volume space including a cafetorium and gymnasium. The original facility was constructed in 1971 with additions and renovations in 1989, 1998, and the most recent kindergarten addition in 2006. The school had up to eight temporary portable classrooms prior to the renovation. The primary focus of this project was to address the conversion of the open space teaching pods into individual classrooms. In addition to the conversion of the teaching pods, the entire roof on the original 1971 building was replaced, the administrative area was reconfigured, and the health suite was upgraded to current

standards. Open concept pods were replaced with enclosed classrooms and grade clusters were formed to maintain cohesion between the individual classrooms. To aid in the interior renovations of the school, several additions were built to relocate key programs.

#### **Running Brook Elementary School Addition**

The Running Brook ES project addressed the population growth of Columbia West region due to the redevelopment of the Columbia Mall into a high density mixed use community. To address this growth, the project provided at least 100 seats of additional classroom space by adding a two-story addition, cafetorium expansion and additional core infrastructure space necessary to operate effectively as a larger school. This expansion improved the utility and effectiveness of the existing academic support spaces.

#### **Stevens Forest Elementary School Renovations**

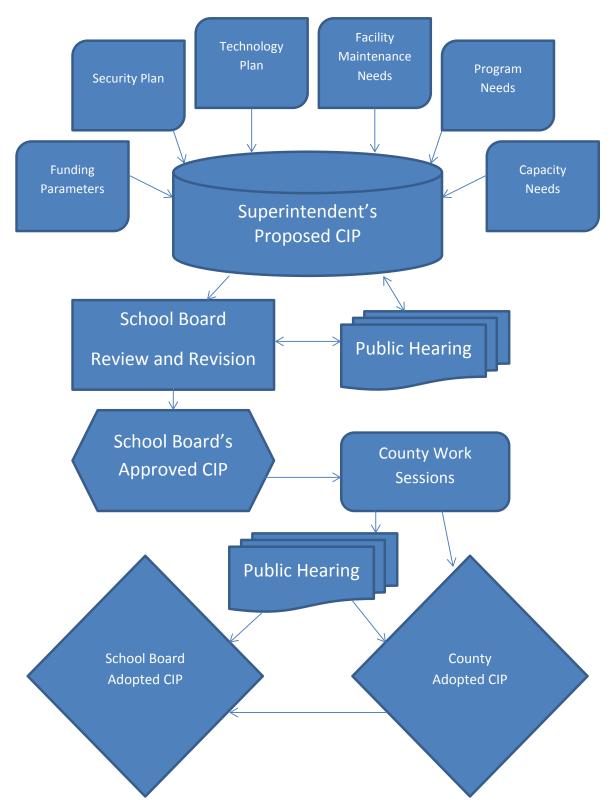

The Stevens Forest ES renovation included programmatic, systemic, and physical upgrades. The main objective was to enclose classrooms within the existing pod footprint and structural bearing walls. Additional programmatic changes included expanding the existing health suite and provision of adequate space for specialized and adjunct classrooms and support areas. Activities in portables were accommodated in the renovated building. Systemic upgrades included complete replacement of the mechanical system, new plumbing fixtures, upgraded electrical service, and new lighting. Energy efficient fixtures and systems are a highlight of the design. Physical upgrades included a roof replacement, refinished gym floor, new doors and hardware, additional exterior windows, new casework, and new finishes. Three additions accommodate program and building function.

Ducketts Lane ES includes an enviornmental study area that makes use of the storm water management pond on the school site.

Capital Improvement Program FY 2017–2021 Long-Range Master Plan FY 2016–2025

# System Information

September 2014

#### **Howard County At A Glance**

The Howard County Public School System (HCPSS) is among the nation's highest performing school districts, with the vast majority of students exceeding achievement standards and going on to higher education. The HCPSS has received national attention for providing a world-class education. The school system's excellence contributed to *CNN/Money* magazine ranking Columbia and Ellicott City #8 in the 2012 "Best Places to Live in America" list.

#### **About Howard County**

Howard County, Maryland is a suburban community of over 290,000, situated midway along the Baltimore-Washington corridor. It is a county of contrast—a blend of old and new, urban and rural, historical and progressive. The county's borders encompass Ellicott City, one of the country's oldest towns, and Columbia, a planned community conceived and designed over 40 years ago by the Rouse Company.

Howard County boasts a number of historical landmarks, including the Bollman Truss Railroad Bridge, the Thomas Viaduct, and nine sites along the Maryland Civil War trails.

The county's 30 regional and community parks, 7 golf courses, 5 lakes, and extensive hiking and biking trails also contribute to the \$590.1 million in annual tourism revenue.

#### **Howard County Fast Facts**

- 95.1% of the population over 25 has graduated high school. (MD State 88.5%)
- 59.5% hold a bachelor's degree or higher. (MD State 36.3%)
- \$107,821 is the median household income, 3rd highest in the country.
- 74.2% homeownership rate with median value of owner-occupied housing of \$435,300.
- 250.74 square miles land area and 1,144.9
   persons per square mile. (MD State land
   area 9,707.24 square miles and 594.8
   persons per square mile.) Howard County is
   smallest Maryland County by land area.
- 3.9% unemployment rate as of April 2014, lowest rate in Maryland. (MD State 5.3%)

#### **Howard County Race/Ethnicity**

#### **HCPSS** Facilities At A Glance

The Howard County Public School System (HCPSS) maintains well over seven million square feet of school facilities and other buildings in service of delivering the educational program and for use by the community. The school system owns or controls approximately 1,827 acres of land. Approximately seven percent of HCPSS staff are devoted in some way to the maintenance of facilities.

#### **HCPSS Facilities**

#### 76 schools

- 41 elementary schools
- 20 middle schools
- 12 high schools
- 3 special schools

#### **Ancillary Facilities**

| Projected Utilization              | 106% |  |

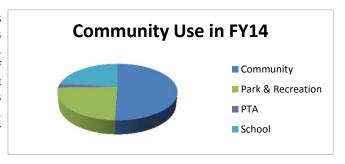

#### **Project Purpose**

The Wilde Lake Middle School project will replace an aging middle school with a larger modern facility in an area slated for growth. The replacement school will provide capacity for 760 students. A 2008 facility assessment concluded that the WLMS building had a net program area deficiency of 13.6 percent, the largest deficiency of educational program area of the 19 middle schools operating at that time. A subsequent feasibility study determined that the cost of an Americans with Disabilities Act (ADA) compliant renovation was comparable to a replacement.

Nearly twice as large as the current school but using less than half the energy, the new facility will be a showcase of energy efficiency. Solar power will allow the net draw from the power grid over the course of a year to be zero. This kind of capital investment can defray operating expenses. The complete scope of this project is defined by the BOE approved construction documents (CD) brochure (see Policy 6020 in the Supporting Data Section for a complete description of the process) and any change orders approved subsequent to submittal of the CD brochure.

#### Community Use at Wilde Lake Middle School

Over 1,900 reservations brought citizens and students into Wilde Lake MS after school hours and on weekends for a variety of community and student programs, meetings, activities and events. An attendance of 209,000 was recorded for these activities. Athletic events, after school activities, performance arts events and camps accounted for the majority of the facility use. Other uses, which include training, elections and other activities, make up the balance of reservations.

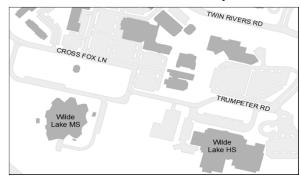

Wilde Lake Middle School Project 1031

Wilde Lake Middle School, located in Columbia, was opened in 1969 as an open concept school and was expanded in 1974. In 1998, it was renovated with classrooms enclosed. During the summer of 2009, Wilde Lake MS went through minor renovations including some miscellaneous interior finishes and demountable partitions.

This building will be Net Zero and US Green Building Council (USGBC) LEED Certified. The building will be powered by solar voltaic cells on the roof. The architectural design is highly efficient considering building orientation, mass, and scale. Daylight is well used. The mechanical systems finely control electric lighting and HVAC and controls. Training will help school based staff make the most of energy efficient design. These considerations position the new Wilde Lake Middle School to be the most energy conscious and efficient school in the state.

#### **School Location Map**

#### **Budget Summary**

#### **Approved Appropriations**

| FY 2014 | Planning     | \$<br>2,658 |
|---------|--------------|-------------|
| FY 2015 | Construction | 8,200       |

#### **Current & Future Requests**

| FY 2016 | Construction | 18,234 |
|---------|--------------|--------|
| FY 2017 | Construction | 12,895 |

#### Total Project Cost Estimate \$ 41,987

This is the third year of funding for Wilde Lake Middle School. During FY 2016, the second year of construction will be implemented. The requested sum of \$18.2 million in FY 2016 will allow construction to progress on schedule. Based upon the current plan, the Board will request a final appropriation for this program in FY 2017 of \$12.9 million to complete work and have the replacement school ready to open in August 2017.

A net zero building generates the energy it uses over the course of a year.

#### **Project Timeline**

| Task Phase                 | 2014 | 2015 |    | 2016 | 2017 |    |
|----------------------------|------|------|----|------|------|----|
| Feasibility Study          | 3m   |      |    |      |      |    |

| <b>Current Relocatables</b> | 6    |
| Current Capacity            | 760  |
| 9/30/13 Enrollment          | 680  |

| Projections / Capacity Utilization |      |  |
|------------------------------------|------|--|
| 2014 Projection                    | 685  |  |
| Projected Utilization              | 90%  |  |
| 2019 Projection                    | 838  |  |
| Projected Utilization              | 110% |  |

#### **Project Purpose**

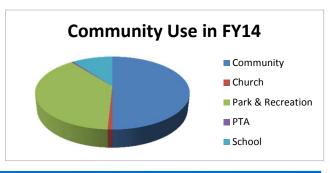

The Patuxent Valley Middle School project will expand educational program spaces and renovate the existing facility to remedy deficiencies in the design, particularly to improve operation and security. Open teaching stations will be reconfigured into self-contained classrooms. Operable walls will be replaced with full height drywall partitions. Modular classrooms will be replaced with permanent additions to the building that will accommodate the classroom spaces and necessary program areas.

The project will include a complete systemic renovation of the existing building including new electrical, mechanical, plumbing, sprinkler, technology, roofing, and life safety systems. Ceilings will be removed and replaced, toilet rooms will be renovated, and ADA accessibility will be addressed to bring the facility into compliance with the HCPSS Guidance Manual for Renovations and Modernizations of Existing Schools.

Patuxent Valley MS will be another USGBC LEED Certified school facility for Howard County. The complete scope of this project is defined by the BOE approved construction documents (CD) brochure (see Policy 6020 in the Supporting Data Section for a complete description of the process) and any change orders approved subsequent to submittal of the CD brochure.

#### Community Use at Patuxent Valley Middle School

Over 852 community use reservations were registered for Patuxent Valley MS in FY 2014. An attendance of 40,310 was recorded for a variety of community and student programs, meetings, activities and events. Athletic events accounted for the majority of facility use. Other uses, which include after school activities and educational activities, make up the remaining reservations.

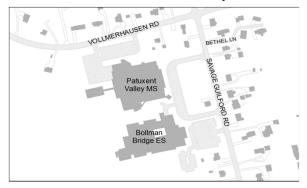

Patuxent Valley MS opened in 1989 with a group of six (6) modular classrooms connected to the building by a covered walkway sometime thereafter. No renovations to the 97,445 square foot school have occurred since the building was originally constructed.

The 2008 facility assessment of middle schools concluded that PVMS had a net 12.7% surplus of educational program area. While the net area meets specification, in 2013 Gilbert Architects found deficiencies in the design.

The systemic upgrades consist of a complete renovation of the existing building including new electrical, mechanical, plumbing, technology, roofing, and life safety systems with an emphasis on energy efficiency. The physical upgrades include relocating the administration office to the main floor, repurposing the oversized library space, reconfiguring the cafeteria access to playground and bathrooms, and providing daylighting throughout the building. ADA improvements will include elevator access to the second floor from the main entrance lobby/stair tower and an upgrade to the Health Suite to present standards.

#### **School Location Map**

| Projected Util. 2019               | 89%  |  |

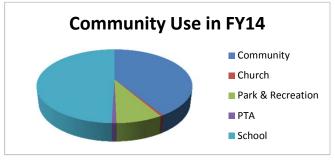

#### **Project Purpose**

The Swansfield Elementary School project will expand educational program spaces with 100 seats of new capacity and renovate the existing facility. Swansfield Elementary School was opened in 1972 and renovated in 1998. The school was expanded in 1988 and 2008. In April 2009, HCPSS engaged Gilbert Architects Inc. to conduct a facility assessment of elementary schools. The report concluded that Swansfield ES had 12.3 percent deficiency of educational program area of the 40 elementary schools operating at that time. The FY 2015 capital budget introduced this project to the Capital Improvement Program. In previous budgets, it was listed as a systemic renovation. In the FY 2015 Capital Budget, the total project cost was estimated at \$19.4 million. In the FY 2016 budget the total project cost estimate is \$25.1 million. The \$5.6 million increase is mainly attributed to the new plan including an addition.

The complete scope of this project will be defined by the BOE approved construction documents (CD) brochure (see Policy 6020 in the Supporting Data Section for a complete description of the process) and any change orders approved subsequent to submittal of the CD brochure.

#### Community Use at Swansfield Elementary School

Over 2,900 reservations brought citizens and students into Swansfield ES after school hours and on weekends for a variety of community and student programs, meetings, activities and events. An attendance of 203,860 was recorded for these activities. After school activities and athletic events accounted for much of the facility use. Other uses, which include child care and camps, make up the remaining reservations.

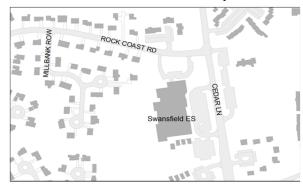

The planned scope of work for the school includes programmatic, systemic, and physical upgrades as required bringing the facility into compliance with the Howard County Public School System Guidance Manual for Renovations and Modernizations of Existing Schools. The programmatic changes include providing individual classrooms and corridors, creating a COMAR compliant health suite, and providing adjunct space to relocate existing portable classrooms inside of the building.

The systemic upgrades consist of a complete renovation of the existing building including new electrical, mechanical, plumbing, technology, roofing, and life safety systems with an emphasis on energy efficiency. The physical upgrades include a refinished gymnasium floor, new doors and hardware, additional exterior windows, as well as new casework and finishes. The project will provide additional capacity of 100 seats and core infrastructure space necessary to operate effectively at the larger capacity.

#### **School Location Map**

#### **Budget Summary**

#### **Approved Appropriations**

FY 2015 Planning \$ 1,898

#### **Current & Future Requests**

 FY 2016
 Construction
 12,361

 FY 2017
 Construction
 10,832

Total Project Cost Estimate \$ 25,091

This is the second year of funding for Swansfield Elementary School. During FY 2016, the first year of construction will be implemented. The requested sum of \$12.3 million in FY 2016 will allow construction to progress on schedule. Based upon the current plan, the Board will request a final \$10.8 million in FY 2017 to complete work and have the school ready by August 2017.

#### **Project Timeline**

| Task Phase                 |    | 2014 | 2015 | 2016 | 2017 |    |

| Projected Util. 2019               | 82%  |  |

#### **Project Purpose**

The Waverly Elementary School project will expand educational program spaces with 100 seats of new capacity and renovate the existing facility. Waverly Elementary School opened in 1990 and was renovated in 2007 to accommodate full day kindergarten. The 2009 facility assessment of elementary schools concluded that Waverly ES had 14.6 percent deficiency of educational program area of the 40 elementary schools operating at that time. The FY 2015 Capital Budget introduced this project in the Capital Improvement Plan (CIP). In previous budgets, it was listed as a systemic renovation. In the FY 2015 capital budget, the total project cost was estimated at \$25.6 million. In the FY 2016 budget, the total project cost estimate is \$27.1 million. The \$1.7 million increase is mainly attributed to the new plan including an addition. The complete scope of this project is defined by the BOE approved construction documents (CD) brochure (see Policy 6020 in the Supporting Data Section for a complete description of the process) and any change orders approved subsequent to submittal of the CD brochure.

#### Community Use at Waverly Elementary School

Waverly ES hosted over 1,620 after school and weekend activities for a variety of community and student programs, meetings, activities and events. An attendance of 91,297 was recorded for these activities. Athletic events accounted for approximately half of the facility use. Other uses, which include child care and after school activities make up the balance of reservations.

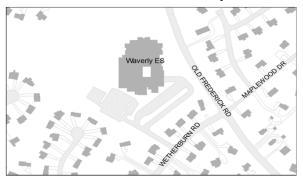

Waverly Elementary School Project 0973

The project calls for an expansion of the educational program spaces and renovation of the existing facility. This will consist of a complete systemic renovation of the existing building including new electrical, mechanical, plumbing, technology, roofing, and life safety systems as applicable per the recent feasibility assessment survey. The project will provide 100 seats of additional classroom space and core infrastructure space necessary to operate effectively at the larger capacity. Interior spaces will be reconfigured, new finishes provided, accessibility improved, and new spaces added as required bringing the facility into compliance renovation specifications.

The Waverly ES Addition supports a long term plan as described in the Feasibility Study. In 2015 and beyond, Manor Woods ES is projected to be above the 110 percent capacity utilization standard and eventually trends above 200 percent. Manor Woods ES is not on public sewer and for that reason expansion is unlikely. Constructing this addition in 2018 can help relieve overcrowding at Manor Woods ES. Beyond that, a new elementary school in Turf Valley that is sized to the current educational specifications is needed after 2020 and could serve as a replacement for West Friendship ES.

#### **Project Purpose**

The Oakland Mills Middle School project will renovate the existing facility. Oakland Mills Middle School opened in 1972 and was renovated in 1998. In August 2008, HCPSS engaged Gilbert Architects Inc. to conduct a facility assessment of middle schools. This project evaluated and scored each school according to the Council of Educational Facilities Planners, International (CEFPI) appraisal guidelines. The assessment included reviewing each school's plan layouts and measurements of spaces to compare to the educational specifications developed by HCPSS for middle schools. The report concluded that Oakland Mills MS had 8.8 percent deficiency of educational program area of the 19 middle schools operating at that time. The FY 2016 capital budget introduces this project to the Capital Improvement Plan. In previous budgets, it was listed as a systemic renovation. In the FY 2015 capital budget the total project cost was estimated at \$26 million. In the FY 2016 budget the total project cost estimate is \$14 million. The \$12 million decrease is attributed to the decision to scope this project as a limited renovation. The complete scope of this project is defined by the BOE approved construction documents (CD) brochure (see Policy 6020 in the Supporting Data Section for a complete description of the process) and any change orders approved subsequent to submittal of the CD brochure.

#### Community Use at Oakland Mills Middle School

Citizens and students spent nearly 4,000 hours at Oakland Mills MS after school hours and on weekends for a variety of community and student programs, meetings, activities and events. An attendance of 48,472 was recorded for these activities. Athletic events accounted for approximately half of the facility use. After school activities and child care are included in the remaining reservations.

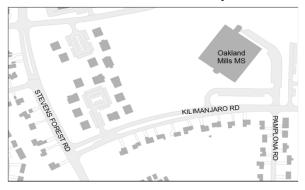

Oakland Mills Middle School Project 1036

The project calls for a limited renovation the existing building in accord with recommendations of a future feasibility study or scope of work review. Renovation may include new electrical, mechanical, plumbing, technology, roofing, and life safety systems as applicable per the scope of work. Some Interior spaces will be reconfigured, new finishes provided, accessibility improved, and new spaces added as required bringing the facility into compliance with the Howard County Public School System Guidance Manual for Renovations and Modernizations of Existing Schools.

<sup>\*</sup>Planning funds received in Systemic Renovation Project.

This is the second year of funding for Oakland Mills Middle School. Planning funds were received in the Systemic Renovation Line in FY 2015. During FY 2016, the first year of construction will be implemented. The requested sum of \$14 million in FY 2016 through FY 2018 will allow construction to progress on schedule and work to be completed by August 2018.

#### **Project Timeline**

| Task Phase                 | 2015 |  | 2016 |    | 2016 |    | 2017 | 2018 |  |

The above chart shows the anticipated calendar year timeline for planning and constructing for this project (in months). The Oakland Mills Middle School Limited Renovation project is scheduled for completion in August 2018.

Oakland Mills Middle School Project 1036

## New Elementary School #42 (Grades K-5) NEW SCHOOL

Project 1028

School Site potentially located adjacent to Thomas Viaduct Middle School at 7000 Banbury Drive, Hanover, MD

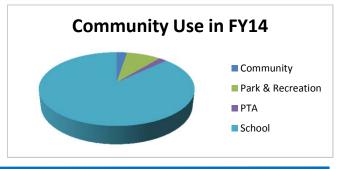

Architect rendering of Ducketts Lane Elementary School courtesy of Grimm + Parker Architects. This is the newest HCPSS elementary school based on the current education specifications.

#### **Project Purpose**

The New Elementary School #42 will be a new facility. Capacity utilization at Ducketts Lane ES, which opened in August 2013, in the northern Route 1 corridor, will continue to grow. Even with additional capacity that may have been found in the Gilbert study, we have know that at least one additional elementary school is needed in the eastern part of the county. The region will exceed 115 percent utilization in 2018 and require close to 1,000 additional seats. The recently completed comprehensive zoning increased the entire housing projection this year by 996 units, most of which was in the East. This capital budget recommends completion of Elementary School #42 in 2019 as was shown in the FY 2015 Capital Budget. Planning is initiated in FY 2016. If high enrollment continues, adjustments can be made to this capital budget or the FY 2017 Capital Budget. The complete scope of this project is defined by the BOE approved construction documents (CD) brochure (see Policy 6020 in the Supporting Data Section for a complete description of the process) and any change orders approved subsequent to submittal of the CD brochure.

#### Community Use at neighbor school Ducketts Lane Elementary School

Community use is anticipated in the planning for this new facility. Ducketts Lane ES serves as a comparison. Ducketts Lane hosted 87,917 attendees for over 3,394 reservations after school hours and on weekends for a variety of events. The majority of the events were school related, and remaining reservations were Park and Recreation and other community events.

The New Elementary School #42 will be designed in conformance with the General Educational Specifications for New Elementary Schools published in February 2010. The building design will provide the best possible learning environment for all elementary students in every aspect of educational program by providing inclusive learning spaces, state-of-the art technology, and sustainable building practices. The prototype is a two-story elementary school designed for a 600 student capacity. The new school will accommodate prekindergarten through fifth grade, as well as the Regional Early Childhood Center. The project will achieve USGBC LEED Gold certification in keeping with the sustainable goals of HCPSS to reduce negative impact on the environment and enhance health and comfort of the building occupants, thereby improving building performance.

A school site is located adjacent to Thomas Viaduct Middle School at 7000 Banbury Drive, Hanover, MD.

#### **Budget Summary**

The above chart shows the anticipated calendar year timeline for planning and constructing for this project (in months). The New Elementary School #42 project is scheduled for opening in August 2019.

## Hammond High School (Grades 9-12) RENOVATION

Project 1024

8800 Guilford Road, Columbia, MD 21046 http://hammondhs.org/

Marcy Leonard, Principal 410-313-7615

#### **Project Purpose**

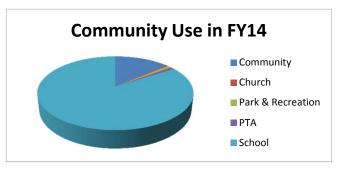

The Hammond High School project will renovate the existing school. Hammond High School is a one story building that first opened in 1976 and underwent some miscellaneous renovation and addition work in 1997, followed by a dance studio addition in 2011. The present need is a complete renovation of the school with systemic upgrades to bring it into compliance with the Howard County Public School Systems Guidelines Manual for Renovations and Modernizations of Existing Schools. The capacity of the school will remain unchanged upon completion of the proposed project. The complete scope of this project is defined by the BOE approved construction documents (CD) brochure (see Policy 6020 in the Supporting Data Section for a complete description of the process) and any change orders approved subsequent to submittal of the CD brochure.

| Building Data            |       |
|--------------------------|-------|
| Year Built               | 1976  |
| Age                      | 38    |
| Site Area (acres)        | 33.14 |
| Last renovation/addition | 2011  |
| Current Relocatables     | 4     |
| Current Capacity         | 1,220 |
| 9/30/13 Enrollment       | 1,256 |

| Projections / Capacity Utilization |                     |       |  |  |  |
|------------------------------------|---------------------|-------|--|--|--|
| 2014                               | 1,270               |       |  |  |  |
| Pr                                 | ojected Utilization | 104%  |  |  |  |
| 2019                               | Projection          | 1,601 |  |  |  |
| Pr                                 | ojected Utilization | 131%  |  |  |  |

#### Community Use at Hammond High School

An attendance of 215,000 was recorded for over 3,900 reservations at Hammond HS outside of school hours for events. Most after school activities at any high school are school related including after school programming, athletic activities, educational activities and performing arts.

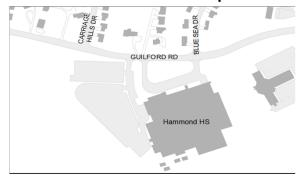

Hammond High School Project 1024

The project will consist of a complete systemic renovation of the school that will replace the aging heating and cooling systems, upgrade the plumbing and electrical systems, supply new data technology and security systems, provide new interior finishes throughout the building, create ADA accessibility compliance throughout, and repartition select areas of the school and construct building additions as necessary to fulfill program deficiencies. It is also the intent to concentrate on energy efficient systems and sustainable practices building thus yielding another USGBC LEED certified facility.

#### **School Location Map**

#### **Budget Summary**

#### **Current & Future Requests**

| FY 2016           | Planning     | \$     | 3,790  |  |  |  |  |
|-------------------|--------------|--------|--------|--|--|--|--|
| FY 2017           | Construction |        | 18,124 |  |  |  |  |
| FY 2018           | Construction |        | 18,999 |  |  |  |  |
| FY 2019           | Construction |        | 18,374 |  |  |  |  |
| FY 2020           | Construction |        | 19,000 |  |  |  |  |
|                   |              |        |        |  |  |  |  |
| Total Project Cos | \$           | 78,287 |        |  |  |  |  |

This is the first year of funding for Hammond High School. During FY 2016, the first year of planning will be implemented. The requested sum of \$3.8 million in FY 2016 will allow planning to progress on schedule. Based upon the current plan, the Board will request construction funding for this program in FY 2017 through FY 2020 totaling \$74.5 million to complete work and have the school ready by August 2020.

#### **Project Timeline**

| Task Phase                 |    | 2016 | 2017 | 2018 | 2019 | 2020 |    |

| Close Out                  |    |      |      |      |      |      | 2m |

The above chart shows the anticipated calendar year timeline for planning and constructing for this project (in months). The Hammond High School Renovation project is scheduled for completion in August 2020.

Hammond High School Project 1024

## Ellicott Mills Middle School (Grades 6-8)

Project 1037

4445 Montgomery Road, Ellicott City, MD 21043 http://emms.hcpss.org/

Christopher Rattay, Principal 410-313-2839

| Building Data        |       |
|----------------------|-------|
| Year Built           | 1939  |
| Age                  | 75    |
| Site Area (acres)    | 16.22 |
| Replacement school   | 2001  |
| Current Relocatables | 3     |
| Current Capacity     | 662   |
| 9/30/13 Enrollment   | 774   |

| Projections / Capacity Utilization |      |  |  |  |  |
|------------------------------------|------|--|--|--|--|
| 2014 Projection 73                 |      |  |  |  |  |
| <b>Projected Utilization</b>       | 111% |  |  |  |  |
| 2019 Projection                    | 883  |  |  |  |  |
| <b>Projected Utilization</b>       | 133% |  |  |  |  |
| Post-renovation Cap.               | 818  |  |  |  |  |
| Projected Util. 2019               | 108% |  |  |  |  |

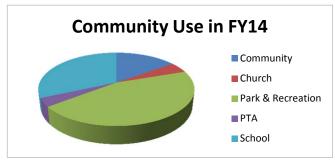

#### **Project Purpose**

The Ellicott Mills Middle School project will add 156 seats of new capacity to the existing school. Ellicott Mills Middle School is the third iteration of the current middle school prototype and opened in 2001. The projections in the June 2014 Feasibility Study support the approved middle school capacity adjustments and the effort invested in redistricting. All middle schools in the Northeast were relieved of overcrowding by the opening of Thomas Viaduct MS, except Ellicott Mills MS. Redistricting scenarios using western capacity failed to resolve crowding and created unacceptable travel distances and unusually elongated attending areas. With these findings, planned expansion of Ellicott Mills MS was contemplated in the Feasibility Study. This project is a next logical step after study of middle school capacity and analysis of redistricting scenarios.

The complete scope of this project is defined by the BOE approved construction documents (CD) brochure (see Policy 6020 in the Supporting Data Section for a complete description of the process) and any change orders approved subsequent to submittal of the CD brochure.

#### Community Use at Ellicott Mills Middle School

Over 4,569 reservations brought citizens and students into Ellicott Mills MS after school hours and on weekends for a variety of community and student programs, meetings, activities and events. An attendance of nearly 550,000 was recorded for these activities. Athletic events and child care accounted for approximately half of the facility use. Other uses, which include after school activities and performing arts make up the remaining reservations.

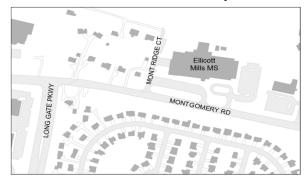

Ellicott Mills Middle School Project 1037

This project will include an addition and light renovation to ensure seamless operation of the expanded facility. The majority of existing walls will remain; therefore, most existing classrooms will remain as classrooms, though they will receive new finishes, cabinetry, doors, data, electrical and mechanical systems. The addition will be designed to retain use natural daylight. The cafeteria will be enlarged to meet educational program requirements. The mechanical system will likely utilize geothermal technology. The school should achieve USGBC LEED Certified certification.

#### **School Location Map**

# Budget Summary Current & Future Requests FY 2017 Planning \$ 432 FY 2018 Construction 3,440 FY 2019 Construction 2,293 Total Project Cost Estimate \$ 6,165

FY 2017 will be the first year of funding for Ellicott Mills Middle School. During FY 2017, the first year of planning will be implemented. The requested sum of \$432 thousand in FY 2017 will allow planning to progress on schedule. Based upon the current plan, the Board will request construction funding for this program in FY 2018 and FY 2019 totaling \$5.7 million to complete work and have the school ready by August 2019.

#### **Project Timeline**

| Task Phase                 |    | 2017 | 2018 |    | 2019 |     |    |
|----------------------------|----|------|------|----|------|-----|----|
| Feasibility Study          | 3m |      |      |    |      |     |    |
| Planning and Design        |    | 12m  |      |    |      |     |    |

#### **Project Purpose**

The Centennial High School project will renovate the existing school. Centennial High School is a one-story building that opened in 1977 and had an addition completed in 2002, followed by a dance studio addition in 2011. The present need is a complete renovation of the school with systemic upgrades to bring into compliance with the Howard County Public School Systems Guidelines Manual for Renovations and Modernizations of Existing Schools. The capacity of the school will remain unchanged upon completion of the proposed project. The complete scope of this project is defined by the BOE approved construction documents (CD) brochure (see Policy 6020 in the Supporting Data Section for a complete description of the process) and any change orders approved subsequent to submittal of the CD brochure.

#### Community Use at Centennial High School

Over 5,613 reservations brought citizens and students into Centennial HS after school hours and on weekends for a variety of community and student programs, meetings, activities and events. An attendance of 604,529 was recorded for these activities. After school use of high schools is primarily school related activities like athletic and performance arts events. Other uses, which include training, elections and other activities make up the remaining 45 percent.

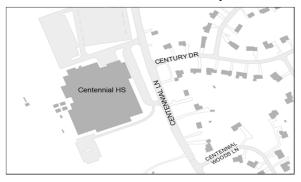

Centennial High School Project 1025

The project will consist of a complete systemic renovation of the school that will replace the aging heating and cooling systems, upgrade the plumbing and electrical systems, supply new data technology and security systems, provide new interior finishes throughout the building, create ADA accessibility compliance throughout, and repartition select areas of the school and construct building additions as necessary to fulfill program deficiencies. It is also the intent to concentrate on energy efficient systems and sustainable practices building thus yielding another USGBC LEED certified facility.

#### **School Location Map**

## Current & Future Requests FY 2022 Planning \$ 6,151 FY 2023 Construction 38,592 FY 2024 Construction 25,728

70,471

FY 2022 will be the first year of funding for Centennial High School. During FY 2022, the first year of planning will be implemented. The requested sum of \$6.2 million in FY 2022 will allow planning to progress on schedule. Based upon the current plan, the Board will request construction funding for this program in FY 2023 and FY 2024 totaling \$64.3 million to complete work in the school by August 2024.

**Total Project Cost Estimate** 

#### **Project Timeline**

| Task Phase                 |    | 2020 | 2021 | 2022 | 2023 | 2024 |    |
|----------------------------|----|------|------|------|------|------|----|
| Feasibility Study          | 3m |      |      |      |      |      |    |
| Planning and Design        |    | 12m  |      |      |      |      |    |
| Contract Bidding and Award |    |      | 6m   |      |      |      |    |
| Construction               |    |      |      |      | 36m  |      |    |
| Close Out                  |    |      |      |      |      |      | 2m |

The above chart shows the anticipated calendar year timeline for planning and constructing for this project (in months). The Centennial High School Renovation project is scheduled for completion in August 2024.

Centennial High School Project 1025

## Long Range Plan Adjustments (Grades K-12) NEW SCHOOLS

#### Sites to be determined

Architect rendering of Marriotts Ridge High School courtesy of TCA Architects. This is the newest HCPSS high school based on the current education specifications.

#### Responding to the 2014 Feasibility Study

Planning and zoning changes require changes to the CIP. While the HCPSS is peripheral to land development discussions, land planning decisions impact school system capital improvement plans. Staff continues to work closely with the Department of Planning and Zoning and Public Works staff to ensure that schools are central to new development. The annual Feasibility Study analyzes these trends and proposes adjustments to the CIP. The projections indicate that the FY 16-25 long range plan requires three more elementary schools and one additional middle school. Previous budgets have introduced ES 42 and HS 13. Ensuring that all of these needs are addressed will probably require a new source of local revenue.

#### **Elementary School Needs**

Elementary enrollment is projected to increase by 3,912 students by 2023 and the capacity utilization of all elementary schools combined will begin to exceed 110 percent by 2020. This is earlier than previous projections and suggests more elementary capacity is needed in the long-range capital improvement plan. The three areas which will experience the greatest growth over the next five to ten years will be the Route 1 Corridor, Columbia Town Center, and Turf Valley.

#### ES 43 - Southeastern ES - 1039

The recently completed comprehensive zoning increased the entire housing projection this year by 996 units, most of which was in the East. ES 42 will be built in the Northeast region at Oxford Square. The needs of the southeast region are evident in the projections of Bollman Bridge ES and Forest Ridge ES. The location of ES 43 is to be determined . A location in close proximity to the planned Transit Oriented Development is desirable.

Artist rendering of the redevelopment of Columbia Town Center. The Columbia Town Center report anticipated future needs as a result of this project

#### ES 44 - Columbia West ES - 1040

Running Brook ES (with expansion) is expected to exceed 110 percent utilization by 2016. A redistricting strategy alone, which uses nearby schools like Clarksville ES will not provide an adequate solution to accommodate the projected growth. Faulkner Ridge Center was closed on July 1, 2011. This site is a likely location for redevelopment as a future school.

#### **Middle School Needs**

#### MS 21 - 1042

The opening of Thomas Viaduct MS in the 2014-2015 school year is a tangible reminder that growth is impacting middle school capacities as well. By 2025, three of five middle schools in Northeast region will have significant overcrowding. The same will be true for all three Southeastern region middle schools. Site acquisition efforts are underway.

#### ES 45 - Turf Valley ES - 1041

Projections continue to support the need for elementary redistricting to relieve overcrowding at Manor Woods ES associated with Turf Valley growth. The addition at Waverly ES can absorb some growth. Considering the limited potential for expanding schools outside of the sewer service area, a Turf Valley school planned. Land is being acquired for this future school.

#### **High School Needs**

#### HS 13 - 1035

Howard HS is experiencing overcrowding. The capacity needs are also projected for Long Reach HS and Hammond HS. A small amount of capacity at Oakland Mills HS is not sufficient to balance these needs. Interim measures are under consideration but the trends eventually point to a new high school. This capital budget recommends completion of HS #13 in 2026 as was shown in the FY 2015 Capital Budget.

## Systemic Renovations RENOVATIONS and ADDITIONS

Project 0980

**Various locations** 

Boiler room at Mount View Middle School.

The Department of School Facilities is charged with maintaining the facilities and grounds of the Howard County Public School System (HCPSS) in as near original condition and effectiveness as possible. Actual costs incurred in the Systemic Renovations Project over the past five years is below.

| Systemic Renovations Actual Expenses |                |            |  |  |  |  |
|--------------------------------------|----------------|------------|--|--|--|--|
| Fiscal Year                          | Actual Expense |            |  |  |  |  |
| FY 2010                              | \$             | 14,536,145 |  |  |  |  |
| FY 2011                              | \$             | 16,533,132 |  |  |  |  |
| FY 2012                              | \$             | 25,048,690 |  |  |  |  |
| FY 2013                              | \$             | 21,798,947 |  |  |  |  |
| FY 2014                              | \$             | 15,593,468 |  |  |  |  |

#### **Project Purpose**

The systemic renovation project will include projects that are needed to bring older facilities up to current standards in lighting, electrical, HVAC systems, reconfiguring space, handicap accessible improvements, and provide for upgrades to other building systems. For larger systemic renovation projects (see schools listed in project details section), the complete scope of projects are defined by the BOE approved construction documents (CD) brochure (see Policy 6020 in the Supporting Data Section for a complete description of the process) and any change orders approved subsequent to submittal of the CD brochure.

| FY 2016 Request Analysis                          |    |               |  |  |
|---|----|---------------|--|--|
| Project Funding<br>(July 1, 2003 - June 30, 2015) | \$ | 218,887,000   |  |  |
| Project Cost-to-Date<br>(through June 30, 2014)   |    | (191,590,971) |  |  |

| Available Project Funding (July 1, 2015)          | \$ | 7,081,362     |  |  |
|   |    |               |  |  |
| Requested Budget FY 2016                          | \$ | 9,263,000     |  |  |
|   |    |               |  |  |

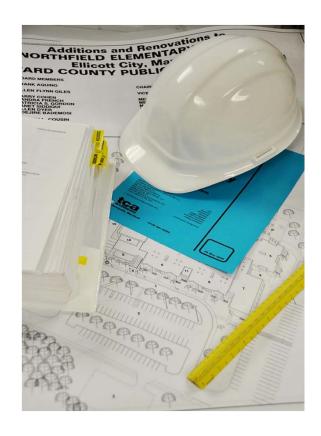

Construction of partition walls.

Systemic Renovations Project 0980

Systemic renovation projects include improvements and installation of systemic renovations at various school sites, including projects of a critical nature such as sprinkler repair, HVAC repair, and window replacement. The department publishes an annual Comprehensive Maintenance Program which reflects the objectives and methods utilized to provide a safe and secure learning environment for Howard County's school community as required by the Public School Construction Regulations. This document has been consulted in the development of this budget for potential systemic projects.

The FY 2016 Capital Budget request represents renovation work or planning for future construction at the following school facilities:

Hollifield Station ES HVAC
Mayfield Woods MS Electronics (Fire Alarm)
Manor Woods ES Electronics (Fire Alarm)
Lime Kiln MS HVAC
Clarksville ES Doors/Frames
Rockburn ES Boiler
Glenwood MS Boiler/Water Heater
Bonnie Branch MS HVAC

Systemic Renovations Project 0980

## **Roofing Projects**

Project 0994

The Facilities Department oversees the Roofing Project and provides maintenance and repairs for all HCPSS facilities. Actual costs incurred in the Roofing Project over the past five years is below.

| Roofing Projects Actual Expenses |                |           |  |
|----------------------------------|----------------|-----------|--|
| Fiscal Year                      | Actual Expense |           |  |
| FY 2010                          | \$             | 4,083,349 |  |
| FY 2011                          | \$             | 5,339,927 |  |
| FY 2012                          | \$             | 4,841,087 |  |
| FY 2013                          | \$             | 3,093,044 |  |
| FY 2014                          | \$             | 5,468,035 |  |

Roof repairs at Burleigh Manor MS.

### **Project Purpose**

The roofing project will address aging roofs on various Howard County Public School System schools. A well planned roofing program is critical to all other systems in a capital facility. When roofing systems wear the damage can impact other systems and multiply costs. Roof planning is more than shingles and asphalt. Modern roofing systems are actually complex investments built to exacting specifications. HCPSS regularly inspects roofing systems and provides reports to the State of Maryland. Planning and project execution must balance system warranties, state funding eligibility and the risk of maintenance deferral.

| FY 2016 Request Analysis                          |    |              |
|---|----|--------------|
| Project Funding<br>(July 1, 2003 - June 30, 2015) | \$ | 40,537,000   |
| Project Cost-to-Date<br>(through June 30, 2014)   |    | (32,363,500) |
| FY 2015 Projected Costs                           |    | (7,067,957)  |
| Available Project Funding (July 1, 2015)          | \$ | 1,105,543    |
|   |    |              |
| Requested Budget FY 2016                          | \$ | 5,000,000    |

Green roof at Ducketts Lane ES.

Roofing Projects Project 0994

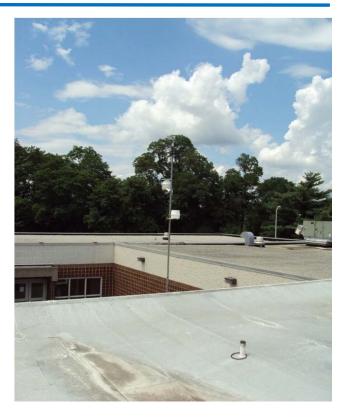

### **Project Details**

The roof system is the largest single area of the building that must endure the most severe weather conditions. The roof protects the structural integrity of the building as well as equipment. Because of building age and environmental conditions, scheduled roof replacements must be completed to protect the investment that has been made in many facilities.

Reroofing for various schools including design and construction of repairs to existing roofs, old roof removal, new flashing and drains, and installation of new roofing structure and material.

The following schools are included in the FY 2016 Capital Budget:

Wilde Lake HS Centennial HS Harpers Choice MS

Roofing Projects Project 0994

### Playground Equipment

Project 0990

#### **Various locations**

The Safety and Risk Management Office oversees the Playground Equipment Project, managing safety requirements and a long term replacement plan for all HCPSS playgrounds. Actual costs incurred in the Playground Equipment Project over the past five years is below.

| Playgrounds Actual Expenses |                |         |  |
|-----------------------------|----------------|---------|--|
| Fiscal Year                 | Actual Expense |         |  |
| FY 2010                     | \$             | 48,579  |  |
| FY 2011                     | \$             | -       |  |
| FY 2012                     | \$             | 398,430 |  |
| FY 2013                     | \$             | 240,677 |  |
| FY 2014                     | \$             | 8,506   |  |

### **Project Purpose**

The Playground Equipment project will replace aging playgrounds at a variety of Howard County Public School System schools. This fund maintains a cycle of playground replacement. While playgrounds seem to be a standard installment at any elementary school, playgrounds can vary widely in design and are not specifically required by state or local codes or policies. Recess and unstructured play is a standard of Policy 9090 - Health and Wellness. Research supports a link between learning and unstructured play. Elementary school students are stimulated by interesting and engaging playground installations. The playground planning process considers the needs of a wide range of ages and skills to develop strength, social skills, coordination, balance and motor planning.

| FY 2016 Request Analysis                          |    |             |
|---|----|-------------|
| Project Funding<br>(July 1, 2001 - June 30, 2015) | \$ | 2,380,000   |
| Project Cost-to-Date<br>(through June 30, 2014)   |    | (1,733,100) |
| FY 2015 Projected Costs                           |    | (512,173)   |
| Available Project Funding (July 1, 2015)          | \$ | 134,727     |
| Requested Budget FY 2016                          | \$ | 300,000     |

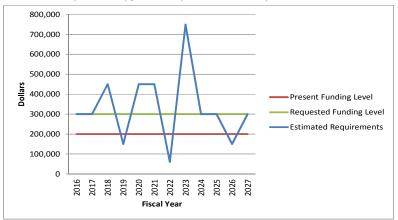

Playground Equipment Project 0990

### **Project Details**

Playground replacement is planned every 15 years. In the interim, they are maintained and repaired using operating funds. This schedule delivers new designs and safety improvements on a reasonable period without requiring a much larger share of the capital budget. The \$300,000 request is adequate for the short term. In future years, more than two playground replacements are needed in one year. The long term plan could be adjusted to smooth out the number of replacements per year by advancing or delaying some projects. Decisions about installing specific equipment are school based and require individual contracts. Better pricing may be possible through package bidding. Playground equipment at newly built schools is included in the funding request for the individual capital improvement project.

| Projected Playground Replacement Co | sts per Fiscal Year |
|-------------------------------------|---------------------|
|                                     |                     |

The chart above shows the estimated funding requirements based upon the long term plan listed to the right. Advancing or delaying some projects may help to smooth the funding profile but the graph shows that present funding levels will not be sufficient with future requirements. Risk management and purchasing staff are exploring different bidding methods with standard design options which may save on design costs.

| Long Term Plan        |             |  |
|-----------------------|-------------|--|
| Playground Site       | Fiscal Year |  |
| Hollifield Station ES | FY 2016     |  |
| Manor Woods ES        | FY 2016     |  |
| Bryant Woods ES       | FY 2017     |  |
| Guilford ES           | FY 2017     |  |

Playground Equipment Project 0990

## Relocatable Classrooms

Project 0993

The School Planning Office evaluates relocatable classroom needs annually in a report to the Board of Education. After a decision is made, the Construction Department oversees the placing and connecting of all HCPSS relocatables. Actual costs incurred in the Relocatable Classrooms Project over the past five years is below.

| Relocatable Classrooms Actual Expenses |                |           |  |
|--|----------------|-----------|--|
| Fiscal Year                            | Actual Expense |           |  |
| FY 2010                                | \$             | 975,223   |  |
| FY 2011                                | \$             | 842,225   |  |
| FY 2012                                | \$             | 2,152,087 |  |
| FY 2013                                | \$             | 1,620,398 |  |
| FY 2014                                | \$             | 1,117,572 |  |

### **Project Purpose**

The Relocatable Classrooms project will provide funds for the relocation of existing portable classrooms or purchase of new portable classrooms to be placed at schools in need of additional capacity. Relocation includes moving the structures as well as the installation of support services that make the portable structures functional classrooms. Additional classroom spaces are needed to help relieve overcapacity schools until such time as permanent classroom spaces are available.

| FY 2016 Request Analysis                          |    |              |
|---|----|--------------|
| Project Funding<br>(July 1, 2003 - June 30, 2015) | \$ | 16,210,000   |

| FY 2015 Projected Costs                           |    | (1,738,550)  |
| Available Project Funding (July 1, 2015)          | \$ | 779          |
|   |    |              |
| Requested Budget FY 2016                          | \$ | 1,500,000    |

Relocatable Classrooms Project 0993

### **Project Details**

It should be noted that in some cases modular units are integrated into a building's core facility. These units are in use at St. John's Lane, and Waverly Elementary Schools, as well as Clarksville Middle School. These units are included in building capacity because they are considered permanent additions. In recent renovations, for example Bollman Bridge ES, they have been replaced. Similar plans are underway at Deep Run Elementary and Patuxent Valley Middle Schools. The school system conducts annual reviews of the physical condition and usage of all relocatable/modular units. When units are inspected, the cost of repairs is weighed against the option of retiring the units. Cycling out, and even reducing the inventory, can create operating economies. However, any dramatic reduction of inventory would require a commiserate investment in brick and mortar construction.

In September 2014, there will be 234 relocatable/modular classrooms in use (four are used for administrative purposes at the Central Office, all others are at school sites). The school system will continue to conduct an annual review of all relocatables which will include condition and usage. The potential to either remove relocatables out-of-service, transport them to other locations where needed, or place them in excess to dispose of in an appropriate manner will be decided upon annually.

This work will be completed in the Summer of 2015.

Relocatable Classrooms Project 0993

## Site Acquisition and Construction Reserve

Project 0995

The School Construction Department oversees the Site Acquisition and Construction Reserve Project. Actual costs incurred in the Site Acquisition and Construction Reserve Project over the past five years is below.

| Site Acquisition/Construction Reserve Actual Expenses |    |           |  |
|---|----|-----------|--|
| Fiscal Year Actual Expense                            |    |           |  |
| FY 2010   | \$ | 16,115    |  |
| FY 2011   | \$ | 51,795    |  |
| FY 2012   | \$ | 4,126,230 |  |
| FY 2013   | \$ | 526,091   |  |
| FY 2014   | \$ | 4,258,073 |  |

Construction of Ducketts Lane ES.

### **Project Purpose**

The Site Acquisition ad Construction Reserve project is needed as a contingency reserve providing funds for use on an asneeded basis. Site funds are needed for future enrollment growth. This account is a contingency fund for site acquisition and school construction at various school sites. Recent emergent maintenance requirements have strained the school system's existing construction contingency accounts and additional funding is required to ensure that urgently needed repairs can be completed without delay.

| FY 2016 Request Analysis                          |    |              |
|---|----|--------------|

Excavators staged for a construction project.

### **Project Details**

This fund is for site acquisition. The selection and acquisition of appropriate school sites is integral to the development of a capital program. Each proposed school site is carefully evaluated prior to acquisition according to Board-approved selection criteria identified in Policy 6000 - Site Selection and Acquisition.

Delays in acquisition of suitable school sites may affect the timing of construction of needed schools. This can result in extended periods of overcrowding situations. In an effort to reduce such delays, the HCPSS continues to maintain a "land bank" that will be called upon to pursue the purchase of potential sites or portions of land to augment sites.

Larger sites identified in the subdivision review process may be reserved to be budgeted as line items in future capital budgets. The state of Maryland regulates but does not pay the costs for site acquisitions; therefore, funds for the purchase of school sites are provided locally by the Howard County Government.

This fund also serves as a construction reserve. Capital planning has been fairly accurate and overruns have been minimal so the actual use of the majority of this fund has been to acquire land. In the past, initial preplanning expenses have been charged to this account, but the FY 2016 budget introduces preplanning as a separate project request.

Loader Excavator operating at a construction site.

## Technology

### **Equipment Replacement**

Project 1021

Teachers utilize technology in media centers to facilitate instruction.

The Technology Operations Office oversees the Technology Project. A staff of 20 provides maintenance and support for over 4,700 teacher laptops and 781 school computer labs totaling over 21,200 computers and approximately 830 printers, copiers and multifunction devices throughout the system.

| Technology Actual Expenses |    |           |  |
|----------------------------|----|-----------|--|
| Fiscal Year Actual Expense |    |           |  |
| FY 2011                    | \$ | 8,027,642 |  |
| FY 2012                    | \$ | 5,335,262 |  |
| FY 2013                    | \$ | 5,714,919 |  |
| FY 2014                    | Ś  | 3.606.457 |  |

Actual costs incurred in the Technology project over the past four years is above.

### **Project Purpose**

The Technology project funds are required for continuous improvements and upgrades to the HCPSS network infrastructure and computer systems to ensure that instruction and business technology needs are met in a standard and equitable manner. Technology refresh programs, known as "Replacement Plans", have been established to ensure that all HCPSS students and school-based staff are equipped with the appropriate computing and network resources. The Replacement Plans are designed to ensure that these essential resources are kept at a standard for instruction and business operations.

| FY 2016 Request Analysis                          |    |              |
|---|----|--------------|
| Project Funding<br>(July 1, 2010 - June 30, 2015) | \$ | 29,486,000   |

Media Centers in each school provide students with access to computers.

Technology Project 1021

### **Project Details**

This project provides funding for technology equipment replacement. Computers for teachers and schools has historically been the most significant use of this funding.

In FY 2016 this project will fund the Replacement Plan 1.5 which is the initiative to provide computing devices to all teachers in support of instructional and administrative tasks. In addition, all high schools will receive new general purpose and media center computers to support student needs.

This initiative is in support of Goals 1, 2, 3 and 4 of Vision 2018 by providing new technologies for the aforementioned areas.

Teacher laptops allow staff to collaborate more effectively.

| Re   | Replace all Computers Purchased in 2011 under RP1.5 with Like Model Computers |                                  |        |                           |        |              |  |  |  |  |  |  |  |  |

In Fall 2015, the Technology Department plans to replace over 4,700 teacher laptops and 1,600 high school computers with updated computing devices. As part of this process, all devices will have the latest approved operating systems and software. Professional development will be provided to staff as needed.

Technology Project 1021

## **School Parking Lot Expansions**

Project 1012

#### **Various locations**

The School Construction Department oversees the School Parking Lot Expansions Project. Actual costs incurred in the School Parking Lot Expansions Project over the past five years is below.

| Parking Lot Expa | nsion | Actual Expenses |
|------------------|-------|-----------------|
| Fiscal Year      | Α     | ctual Expense   |
| FY2010           | \$    | 4,538           |
| FY2011           | \$    | 28              |
| FY2012           | \$    | 1,976,199       |
| FY2013           | \$    | -               |
| FY2014           | \$    | -               |

### **Project Purpose**

Parking lot expansions are necessary due to the insufficient supply of spaces to meet existing needs. Funds are used for parking improvements on sites that are not slated for other construction projects. The project provides for the construction of additional parking spaces and modification of parking lots to improve traffic flow patterns at existing school sites.

#### **Project Details**

There are no parking lot projects scheduled for the 2014-2015 year. Future projects are to be determined as needed.

### Planning and Design

Project 1038

#### **Various locations**

**tca** | architects

Feasibility Study for Wilde Lake Middle School

for the
Howard County Public School System

tca | architects Annapolis, Maryland 410-841-6205

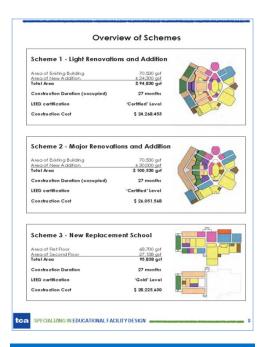

#### **Project Purpose**

The Planning and Design project has been established to provide funding for feasibility studies prior to the funding of individual projects. During the concept development stage, each project is summarized, supporting documentation is gathered, and necessary approvals are obtained before construction begins. A feasibility study provides the analysis to determine the scope and breadth of a project under consideration.

The value of these studies is having the flexibility to ask technical questions about projects before the formal design process. With these studies projects can be "right sized." The replacement of WLMS is a good example. The above feasibility study helped guide a decision to replace. Pricing for these studies is favorable because design consultants want to obtain the full design project.

Through a feasibility study the Board is able to examine the needs of an existing building as well as unexpected design circumstances. These studies ensure the selection of the most effective scope for each project. This process will reduce the costs associated with significant changes in scope which often occur in a compressed planning schedule. In the construction phase, the reduced number of change orders will lessen the impact on the construction schedule and decrease incremental costs.

The Office of School Construction oversees the planning and design for capital projects. Staff serve as the fiduciary agent for the administration of the Howard County Public School System/Board of education construction contracts. The Office recommends the selection of design consultants of capital projects to the Board of Education and supervises these consultants.

## Proposed Feasibility Studies in FY 2016

Hammond High School Renovation

Ellicott Mills Middle School Addition

Dunloggin Middle School Renovation/Addition

Talbott Springs Elementary School Renovation

Patapsco Middle School Renovation

Planning and Design Project 1038

### **Barrier Free Projects**

Project 0989

The facilities Department oversees the Barrier Free Project. Actual costs incurred in the Barrier Free Project over the past five years is below.

**Barrier Free Actual Expenses Fiscal Year Actual Expense** FY 2010 \$ 199,951 \$ FY 2011 189,386 FY 2012 \$ 74,420 FY 2013 \$ 77,734 FY 2014 \$ 119,445

An accessibility ramp to access upper level play area at Bryant Woods ES.

### **Project Purpose**

The Barrier Free Project will include installation of ramps; alteration of restrooms, fixtures and drinking fountains; and various modifications to make all remaining spaces (school buildings and school sites) accessible to the public, students, teachers, and staff. Federal, state, and local regulations require that school facilities be made accessible to the physically handicapped by removing barriers to access. Examples of projects include stadium bleacher ramps, play field access ramps, automatic door opening devices, and reconfiguration of bathroom fixtures and partitions to allow wheelchair access. Other school specific projects that remove barriers as described in justification.

Lift room for access to stage.

Barrier Free Projects Project 0989

### **Project Details**

The Americans with Disabilities Act (ADA) of 1990 is a comprehensive civil rights law that makes it unlawful for public and private employers to discriminate against individuals with disabilities. This law as well as COMAR and best risk management practices require that HCPSS be ready to adjust our physical plant for access.

The barrier-free fund ensures our facilities provide full access to all students. When buildings are designed access issues are addressed in the schematic phase of a project. This practice generally produces buildings that are more accessible at the best cost.

With changing student enrollment, unique access issues may arise after the building is completed. This fund is used to make sensible, low cost adjustments to improve overall access. This project is ongoing.

Elevator for transportation to the second-story level.

# POLICY 6020 SCHOOL PLANNING/SCHOOL CONSTRUCTION PROGRAMS

Effective: July 1, 2010

#### I. Policy Statement

The Board of Education is responsible for providing safe and nurturing educational and work environments for all students and staff. The Board recognizes the continuing need to plan, design, and construct new educational facilities and to renovate or make additions to existing schools that are in accordance with all applicable code, as well as Maryland and federal law. Fulfilling this responsibility requires a comprehensive program that monitors population trends, enrollment trends, educational program spatial requirements, cost/benefit considerations, technologies that support environmentally responsible construction, and an annual six-year capital improvement program.

#### II. Purpose

The purpose of the policy is to establish guidelines for the administration of the School Planning and the School Construction programs.

#### III. Definitions

Within the context of this policy, the following definitions apply:

- A. Architect/Engineering Firm (A/E) A designation usually reserved by law for a person or organization professionally qualified and duly licensed to perform architectural and/or engineering services including, but not necessarily limited to, analysis of project requirements; creation and development of the project design; preparation of drawings, specifications, and bidding requirements; and general administration of the construction contract.
- B. Beneficial Occupancy The use by the owner of a project or portion thereof before all the terms of the contract are complete.
- C. Bid The price a contractor commits to for constructing a project.
- D. Bid Procedures Criteria to determine the award of a contract pursuant to Policy 4050 Procurement of Capital Materials, Supplies, Equipment, and Services.
- E. Bonds General obligation documents issued by the county to borrow money to fund capital projects.

- F. Capital Improvement Program (CIP) All capital improvements listed as part of the Board's annual approved capital budget.
- G. Capital Improvement Project Any physical betterment or improvement and any preliminary studies and surveys relative thereto, including but not limited to, any property of a permanent nature, and equipment needed in connection with such improvement when first erected or acquired.
- H. Change Order A written document to the contractor signed by the owner and engineer or architect, issued after the execution of the contract, authorizing a change in the work or an adjustment in the contract sum.
- I. Construction Manager (CM) A person or organization hired to coordinate and manage the construction phases of a project with the objective of minimizing project construction time and cost while maintaining the quality, function, and aesthetics of the building.
- J. Design Stages The three phases of an architect's basic services, which include:
  - 1. Schematic Design (SD) the first phase of the architect's basic services. In this phase, the architect meets with the project planning team to ascertain the requirements of the project and prepares schematic design studies consisting of drawings and other documents illustrating the scale and relationship of the project components for approval by the Board. A statement of probable construction cost is also submitted at this time.
  - 2. Design Development (DD) the second phase of the architect's basic services. In this phase the architect prepares, from the approved schematic design studies, the design development documents for approval by the Board. These design documents consist of drawings and other documents to fix and describe the size and character of the entire project as to structural, mechanical and electrical systems, materials and other essentials as may be appropriate. The architect also submits to the Board a further statement of probable construction costs.
  - 3. Construction Documents (CD) the third phase of the architect's basic services. In this phase the architect prepares, from the approved design development documents, the working drawings, specifications, and necessary bidding information for approval by the Board. A final cost estimate is prepared before the project is bid.
- K. Facility Design Plans, elevations, sections, and other drawings and specifications that may be necessary for a building or other structure.

- L. Facility Planning Educational and architectural planning and analysis used to produce and design the concept for school projects.
- M. Final Occupancy The point at which all or a designated portion of a building complies with the provisions of a contract and all applicable county and state statutes and regulations.
- N. Interagency Committee on School Construction (IAC) The state agency responsible for the review/approval of construction documents and funding of schools or school construction projects.
- O. Office of Safety, Environment and Risk Management The office that is responsible for reviewing and monitoring the design and construction phases related to environmental initiatives, such as Integrated Pest Management (IPM), Indoor Air Quality (IAQ), and Asbestos Abatement.
- P. Office of School Construction The office that is responsible for all phases of planning, design and construction of new schools as well as additions to and comprehensive modernization of existing schools, from planning through occupancy.
- Q. Office of School Planning The office that is responsible for projecting needs based on demographics for the purpose of assisting the Superintendent in the development of the Capital Improvement Program.
- R. Punch List List made near the completion of work, indicating items to be furnished or work to be performed by the contractor or subcontractor in order to complete the work as specified in the contract documents.
- S. State of Maryland Public School Construction Program (PSCP) Program that provides for the funding of public school construction.
- T. Sustainable Design Design that seeks to reduce negative impacts on the environment and the health and comfort of building occupants, thereby improving building performance. The objectives of sustainability are to reduce consumption of non-renewable resources, minimize waste, and create healthy, productive environments.
- U. Warranty/Guarantee Period Period of time in which the quality of work and/or satisfactory performance is guaranteed.

#### IV. Standards

- A. This policy and associated implementation procedures apply to the capital improvement projects that are listed as part of the Board's annual approved capital budget requiring contracts and consultant agreements.
- B. The Howard County Public School System (HCPSS) employs sustainable design construction that supports educational program needs and creates a safe and nurturing environment for students and staff within allotted budgetary resources.
- C. The school planning/school construction program involves a sequential plan of action and is divided into ten general categories, each requiring professionally trained and experienced staff to plan and carry out the requirements of the program consistent with the Superintendent's Safety Guidelines for Renovation and Construction Projects and all applicable regulations.
  - 1. Long-Range Planning and Student Population Projection
    - a. This category involves the annual projection of pupil population and general population growth by the Office of School Planning. Short-range demographic studies to support the Capital Improvement Program, school attendance area studies, transportation planning, and other special needs are also included.
    - b. By state regulation the Board is also required to develop, maintain, and annually update a master plan for the school system for submission to the IAC. This plan has as its basis a variety of population studies which guide the decision making for school facilities on both a long and short-term basis.

#### 2. Capital Improvement Program

- a. The Capital Improvement Program is a projection of the school facility needs for the next fiscal year (Capital Budget) and the following five-year period. The Capital Improvement Program is based on needs to support the educational program of the system with new schools, modernizations, and other construction projects.
- b. The local Capital Improvement Program serves as the basis for state funding requests through the Interagency Committee for School Construction and the State of Maryland Public School Construction Program.

#### 3. Site Selection

Procedures for site selection and summarization of site size criteria for elementary, middle and high schools are addressed in Policy 6000 Site Selection and Acquisition. As part of the selection process, the Office of School Construction produces studies including site layouts and environmental assessments.

#### 4. Architect/Engineering Firm and Construction Manager Selection

Procedures for architectural/engineering and construction management services selection are addressed in Policy 6030 Procurement of Architectural/Engineering and Construction Management Services.

#### 5. Facility Planning and Facility Design

The facility planning and design process allows for orderly and systematic design of school facilities. This process is conducted using either the Board-approved General Elementary Educational Specifications for New Schools, General Educational Specifications for New Howard County Middle Schools, General Educational Specifications High Schools, or the Board approved Guidelines Manual for Renovations and Modernizations of Existing Schools as the basic references for the facility in question. These documents describe the basic educational philosophy, instructional program, and spatial requirements needed to implement the planning and construction program.

#### 6. Bid and Award

The bid and award procedures for school construction projects conform to those used for the procurement of other goods and services which are addressed in Policy 4050. In addition, these procedures comply with the requirements of the State of Maryland Public School Construction Program.

#### 7. Contract and Construction Administration

The Office of School Construction is responsible for monitoring construction work and administering the schedule, budget, and change orders that affect the scope and/or cost of the work. A school construction progress report which includes these topics is submitted monthly to the Board.

In accordance with the provisions of Policy 6030, a construction manager may be hired to manage the construction process.

8. Official Acceptance of Capital Improvement Projects

Capital improvement projects may be designed to be accepted in stages or upon total completion of work, based on staff recommendation to and approval by the Board.

9. Post-Acceptance Evaluation

Use, occupancy, and evaluation by staff may occur only after the project has been officially accepted. The Board will receive a final report following the walk-through.

10. Temporary and Relocatable Facilities

Relocatable classroom units should be considered under the following conditions and within the context of Policy 6010 School Attendance Areas:

- a. Where school population growth occurs
- b. Where school capacity is near maximum
- c. When boundary lines are adjusted
- d. Where population is projected to remain high for at least one year
- e. Where school construction or renovation projects require the provision of swing space to accommodate the student population and minimize the impact on instruction.

Where excess population is projected to remain beyond four years, consideration should be given to an addition or new construction.

D. To the extent possible, school facilities and sites should be available for after school use by the community. The possibility of joint use development of school and recreational facilities, including joint construction of school and recreational space, is encouraged on a case-by-case basis.

#### V. Compliance

- A. The Superintendent/Designee is responsible for the administration of the school planning and construction programs.
- B. The Office of School Planning and the Office of School Construction are responsible for collaboration in order to obtain the efficient implementation of this policy.
- C. For Capital Improvement Projects, the Principal is responsible for communicating project information to the parent community in a timely manner.

#### VI. Delegation of Authority

The Superintendent is authorized to develop appropriate procedures to implement this policy.

# POLICY 6020-PR IMPLEMENTATION PROCEDURES SCHOOL PLANNING/SCHOOL CONSTRUCTION PROGRAMS

Effective: July 1, 2010

These procedures apply to the construction of new schools and the modernization/renovation of existing facilities that are included in the Board's Capital Improvement Program.

#### I. Long-range Planning and Student Population Projection

The Office of School Planning will:

- A. Gather enrollment, population, and housing data from appropriate sources
- B. Provide an annual projection using the cohort survival method or other established demographic methodology
- C. Provide an annual report of projection accuracy to the Board of Education.

#### **II.** Capital Improvement Program

The Office of School Planning and the Office of School Construction will:

- A. Develop the Capital Improvement Program based on population growth and anticipated needs of that population
- B. Present the Board's requested six-year Capital Improvement Program, which includes a request for the next fiscal year (capital budget) and the following five-year period
- C. Prepare the State of Maryland Public School Construction Program (PSCP) budget funding request
- D. Incorporate the state budget request with the Board six-year Capital Improvement Program to determine the annual county Capital Improvement Program request
- E. Select and analyze site(s).

#### III. Site Selection

Site selection and acquisition is recommended to the Board after being analyzed for appropriateness for a school. (See Policy 6000 Site Selection and Acquisition.)

#### IV. Architect/Engineering Firm and Construction Manager Selection

Procurement of architectural/engineering and construction management services are recommended to and approved by the Board in compliance with Policy 6030 Procurement of Architectural/Engineering and Construction Management Services.

#### V. Facility Planning and Facility Design

A facility planning team is convened, consisting of school and community members, personnel from the Office of School Construction, a designee from the Office of Safety, Environment and Risk Management, other central office personnel, the project architect, and others who may be named by the Superintendent/Designee. The planning team provides input to the architect in developing a series of three design studies that meets Board policy as well as the objectives of the applicable educational specifications or renovation guidelines.

The series of three design studies is as follows:

#### A. Schematic Design Phase

- 1. Planning team named by the Superintendent/Designee
- 2. Description of conceptual design
- 3. Initial cost analysis
- 4. Presentation to and approval by the Board.

#### B. Design Development Phase

- 1. Description of the design
- 2. Detailed layouts of subject areas
- 3. Cost analysis
- 4. Presentation to and approval by the Board.

#### C. Construction Documents Phase

- 1. Description of the final design
- 2. Cost analysis and cost reduction
- 3. Final review of drawings and specifications
- 4. Presentation to and approval by the Board
- 5. Preparation of bid documents.

The above steps may be combined. In each phase, the effect on the occupants, the building structure, and/or systems is considered. Each phase is submitted for review and approval by the Board and the Interagency Committee on School Construction (IAC). Copies of the Howard County Public School System (HCPSS) response to the design

submission review letters from the IAC approving agencies will also be submitted to the Board

#### VI. Bid and Award

Pursuant to Policy 4050 Procurement of Capital Materials, Supplies, Equipment, and Services, these procedures call for a publicly announced bid period during which interested bidders examine the bid documents and submit a sealed bid by the date and time required. The bid documents are opened in public and the price submitted for each bid item is read aloud. At a subsequent meeting of the Board, the results of the bid are presented and a recommendation to award to the lowest responsible and responsive bidder is made.

The final decision is made by the Board. Upon submission of all documents, bonds, and other matters required in the contract, a formal contract is signed.

#### VII. Contract and Construction Administration

#### Office of School Construction

The project architect serves as the Board's representative and administers the contract, answers technical questions, approves submittals, and initiates change orders and requests for proposals subject to the Board's approval. The Office of School Construction coordinates the completion schedule with the principal/designee and other school system personnel to ensure that furniture and equipment deliveries, technology services, and food services satisfy the requirements for their respective sections. Prior to the opening of school, the Office of School Construction monitors each project to resolve any last minute problems and continues this supervision during the warranty period.

The Office of School Construction supervises the construction, budget, schedule, and quality of work, administers change order requests, and administers the warranty period. When school projects are technically complex, have a very short construction time, or require staff attention beyond the time available, a construction manager may be hired to manage the construction process.

#### B. Office of Safety, Environment and Risk Management

The Office of Safety, Environment and Risk Management monitors the design and construction phases at regular intervals and in response to specific concerns. Consistent with all statutory requirements, monitoring includes Integrated Pest Management (IPM), Indoor Air Quality (IAQ), and abatement of potentially hazardous materials.

#### **VIII.** Official Acceptance of Capital Improvement Projects

New facilities and other Capital Improvement Projects may be accepted in several ways. If conditions permit, the school system will wait until all major and minor building system corrections are fully complete and all minor repairs, deficiencies and discrepancies (punch list items) have been corrected. The project architect will then certify that the building is complete and has been constructed according to the drawings and specifications. This marks the beginning of the warranty period for the building. School facilities are typically scheduled so that all construction will be complete and the building ready for acceptance in early summer. Final inspection and acceptance involves a review of the project at substantial completion of construction, which includes listing items to be adjusted, corrected, or completed by the contractor's "punch list." In most cases, the project is complete except for minor system work and completion of the punch list items by late summer.

The Office of School Construction is responsible for certifying, as applicable, beneficial occupancy, final occupancy, move-in, punch list, and warranty/guarantee.

#### IX. Post-Acceptance Evaluation

- A. After project acceptance, furnishings and movable equipment can be installed, supplies can be delivered and stored, and the staff can occupy the facility for operation. At this time, the construction project enters into a one year guarantee and a two year mechanical/electrical guarantee period during which time discrepancies in the workmanship, materials, and equipment supplied under the contract are noted and corrected. Some specifically identified warranties/guarantees may be longer than one to two years.
- B. Following the move-in, the Office of School Construction works closely with the school administration and maintenance personnel to correct any problems that arise during the warranty period.
- C. After the first instructional year following construction, a walk-through of the facility is conducted to evaluate the success of the facility as a teaching environment and the success of the educational concepts in the General Elementary Educational Specifications for New Schools, or General Educational Specifications for New Howard County Middle Schools, or General Educational Specifications High Schools or Guidelines Manual for Renovations and Modernizations of Existing Schools in effect at the time the project was designed. The facility is also evaluated as to use of materials, building systems, construction quality, and other aspects pertaining to the building.

- D. A walk-through of the building by a representative team of stakeholders may include a:
  - 1. Teacher representative
  - 2. Administration personnel
  - 3. Custodian
  - 4. PTA representative
  - 5. School facilities representative(s)
  - 6. Designee from Safety, Environment and Risk Management.

#### X. Temporary and Relocatable Facilities

Placement of temporary and relocatable portable facilities is determined by and implemented as follows:

- A. Presentation of current population projections
- B. Identification of where new units are needed
- C. Evaluation of site plans
- D. Evaluation of cost implications
- E. Presentation to and approval by the Board
- F. Reassignment or procurement of units
- G. Installation of units
- H. Post installation inspection by the Office of School Construction.

ADOPTED: September 13, 1990 AMENDED: January 14, 2010 EFFECTIVE: July 1, 2010

## **Glossary of Terms**

ADA: Americans with Disabilities Act.

ADDITION (SCHOOL): A school addition is defined as any type of space that adds capacity or provides space for a new program.

BUILDING: A structure, either permanent or relocatable, consisting of constructed walls, roof, and floor. A structure that has the same floors, ceiling, and walls and is not separated by an open air space is considered one building.

PERMANENT: A structure built with a fixed foundation that has permanently attached walls, roof, and floor that cannot be moved or transported either as a unit or in sections.

RELOCATABLE: A building or portion of a building made up of prefabricated units that may be disassembled and reassembled frequently, or a single unit of construction consisting of walls, roof, and floor that is movable as a unit either on wheels or by truck. Mobile, demountable, dividable, modular, and portable buildings are types of relocatable units.

CAFETORIUM: A space within an educational facility that is used as both a cafeteria and an auditorium.

CAPACITY: Number of students that may be housed in a facility at any given time based on a utilization percentage of the total number of existing satisfactory student stations.

CIP: Capital Improvement Program

CLASSROOM: An instructional space requiring no special design or equipment and used for housing general programs such as language arts, social studies, and mathematics.

CLEAN AIR ACT: This program includes projects to convert or replace cooling equipment in school facilities so that they will no longer use ozonedepleting refrigerants.

COMAR: Code of Maryland Regulations.

COURTYARD: A large open space, usable by the student body or faculty, enclosed or surrounded by buildings.

COVERED WALKWAY: Enclosed or unenclosed covered passageways connected to a building outside the exterior walls.

EDUCATIONAL FACILITIES: "Educational facilities" means the buildings and equipment, structures, and special educational use areas that are built, installed, or established to serve primarily the educational purposes and secondarily the social and recreational purposes of the community and which may lawfully be used as authorized by the Maryland Statutes and approved by boards.

FEASIBILITY STUDY: The examination and analysis of information related to projected educational facilities to determine whether they are reasonable and possible.

FY: Fiscal Year.

G.S.F.: Gross Square Feet.

GYMNASIUM: An instructional area designed or adapted specifically for physical education activities. Regular or special classrooms connected to, or contained in, gymnasiums are recorded individually as regular or special classrooms and not as part of the gymnasium.

GYMNATORIUM: A space within an educational facility that is used both as a gym and an auditorium.

HVAC: Heat, ventilation, air conditioning, and refrigeration.

## **Glossary of Terms**

KINDERGARTEN CLASSROOM: A special classroom designed or provided with special built-in equipment for use by a group or class organized to provide educational experiences for children preceding the first grade. Room must not be located above the first floor and must have self-contained rest rooms.

LABORATORY: An instructional area designed for and furnished with specialized equipment to serve the needs of a particular program of study. Included in this category are science laboratories, language laboratories, reading laboratories, and vocational/technology laboratories.

LEED: Leadership in Energy and Environmental Design is a green building certification program.

LIMITED RENOVATION (LR): Includes projects that upgrade or replace a minimum of five major building systems and include widespread educational or architectural enhancements in schools or part(s) of schools that have been in use for more than 15 years. A limited renovation upgrades an existing building and site, or a portion of a building and site, to achieve many, but not all, of the current educational, building performance, and aesthetic qualities of a new school. A limited renovation allows further participation by the State within 15 years after the project is placed in service for projects that were not included in the original awarded scope of the Limited Renovation.

LONG-RANGE PLANNING: Devising a systematic method based on educational information and needs, carefully analyzed, to provide the facilities to meet the goals and objectives of the educational agency for a period of five years.

MAINTENANCE AND REPAIRS: The upkeep of educational and ancillary plants, including, but not limited to, roof or roofing replacement short of complete replacement of membrane or structure; repainting of interior or exterior surfaces; resurfacing of floors; repair or replacement of glass; repair of hardware, furniture, equipment,

electrical fixtures, and plumbing fixtures; and repair or resurfacing of parking lots, roads, and walkways. "Maintenance and repair" shall not include renovation except for the replacement of equipment with new equipment of equal systems meeting current code requirements, provided that the replacement item neither places increased demand upon utilities services or structural supports nor adversely affects the function of safety to life systems.

MEDIA CENTER: An area specifically designed or adapted as a place for study, reading, and the custody, circulation, and administration of a collection of books, manuscripts, and periodicals kept for use by the student body.

MULTIPURPOSE ROOM: An instructional area designed or adapted specifically for two or more of the combined functions that might normally be used for assemblies, physical education, lunch, music, clubs, audiovisual work, and library services. Separate gymnatoriums and cafetoriums are not classified as multipurpose rooms.

MUSIC ROOM: An instructional area designed or provided with special built-in equipment for learning activities involving choral and instrumental music.

NEW CONSTRUCTION: Any construction of a building or unit of a building in which the entire work is new or an entirely new addition connected to an existing building or which adds additional square footage to the space inventory.

N.S.F.: Net Square Feet.

PARCEL: The unique acreage of contiguous land. Typically consists of a plot of land that is not divided by a county, city, state, or federally owned or maintained road or highway.

### **Glossary of Terms**

PROJECT FEASIBILITY STUDY: A project and site evaluation study to determine the suitability of the site for the project in question. A pre-design architectural study which may look at various scenarios before an architect is engaged to design the renovation or new construction.

PUBLIC SCHOOL CONSTRUCTION PROGRAM (PSCP): The Maryland Public School Construction Program funds the cost of constructing certain school capital improvements or portions thereof up to the extent of the approvals by the Board of Public Works and consistent with the current regulations, subject to annual appropriations.

RENOVATION: The rejuvenating or upgrading of existing facilities by installation or replacement of materials and equipment and includes, but is not limited to, interior or exterior reconditioning of facilities and spaces; air-conditioning, heating, or ventilating equipment; fire alarm system; emergency lighting; electrical systems; and complete roofing or roof replacement, including replacement of membrane or structure. (In this context, the term "materials" does not include instructional materials.) PSCP distinguishes between different types of renovations, depending upon their scope.

REPLACEMENT: Projects to replace the majority or the entirety of an existing school where the cost of renovation is prohibitive, or site/building layout and other technical factors make renovation of the entire structure infeasible. Replacement may include expansion to increase capacity, and must typically be justified on the basis of a feasibility study.

RESOURCE ROOM: An instructional space used primarily to enhance and support, not supplant, instruction received in regular or special classrooms. Generally designed to accommodate fewer students than other classrooms.

ROOM: A space enclosed on all sides. Alcoves or recesses are not considered separate rooms and should be included in the NSF of the room where such spaces are found.

SITE: A space of ground occupied or to be occupied by an educational facility or program.

SITE DEVELOPMENT: Site development means work that must be performed on an unimproved site in order to make it usable for the desired purpose; or, work incidental to new construction or to make an addition usable.

SITE IMPROVEMENT: The work that must be performed on an existing site to improve its utilization, correct health and safety deficiencies meet special program needs or provide additional service areas. Site improvement incident to construction is the work that must be performed on a site as an accompaniment to the construction of an addition to an educational facility of for a modernization project.

USGBC: U.S. Green Building Council administers the LEED building program which certifies green buildings.
